The USC Sol Price School of Public Policy is home to more than 200 faculty members from diverse disciplines and backgrounds who contribute to an environment that fosters innovation, entrepreneurship, experimentation and collaboration.

The USC Price School of Public Policy provides a dynamic learning environment where interdisciplinary education abounds. At USC Price, students choose a program of study from the independent yet related fields of public administration and leadership, public policy, nonprofits and philanthropy, health management and policy, urban planning, real estate development and executive leadership. Students are supported by a committed faculty who contribute to the strong sense of community present in the school.

The school’s mission is to improve the quality of life for people and their communities. Faculty engage in solving some of society’s most pressing issues—and challenge students to do the same. USC Price is renowned for its expertise in areas such as: sustainability and the environment, health care policy, nonprofit management, housing and real estate, transportation, infrastructure, urban development and land use, social policy, governance, civic engagement, community development, immigration and risk analysis, among others.

Defining characteristics of USC Price are the depth of its academic classroom experience and connecting classroom theory to professional practice through practicums, internships and laboratory work locally, nationally and around the globe. Students graduate with the knowledge, skills and experiences to lead in their chosen field of practice.

Today’s complex challenges call for leaders who are able to work across disciplines and across the public, private and nonprofit sectors to find solutions. It is for this multidisciplinary reality that USC Price prepares its students.

USC Price students go on to hold high-ranking appointments in our nation’s capital, analyze and design new transportation systems, and redesign city, county, state and federal governance structures—in the United States and abroad.

John Sonego, M.A., Associate Dean for Development and External Relations

Faculty

C. Erwin and Ione L. Piper Dean’s Chair: Jack H. Knott, Ph.D.

University Professor: Kevin Starr, Ph.D. (History)

Walls Annenberg Chair in Communication and Journalism: Manuel Castells, Ph.D. (Communication)

Judith & John Bedrosian Chair in Governance & Public Enterprise: Raphael Bostic, Ph.D.

Blue Cross of California Chair in Health Care Finance: Glenn A. Melnick, Ph.D.

C.C. Crawford Chair in Management and Performance: Anthony Bertelli, Ph.D.

Margaret and John Ferraro Chair in Effective Local Government: Genevieve Giuliano, Ph.D.*

Lusk Chair in Real Estate: Richard K. Green, Ph.D. (Business)

Jeffrey J. Miller Chair in Government, Business and the Economy: Elizabeth Graddy, Ph.D.*

Emery Evans Olson Chair in Nonprofit Entrepreneurship & Public Policy: James M. Ferris, Ph.D.

Quintiles Chair in Pharmaceutical and Regulatory Innovation: Darius Lakkadwalla, Ph.D. (Pharmacy)

Leonard D. Schaeffer Director’s Chair of the USC Leonard D. Schaeffer Center for Health Policy and Economics: Dana Goldman, Ph.D.*

Norman Topping Chair in Medicine and Public Policy: Paul B. Ginsburg, Ph.D.

Maria R. Crutcher Professor of Citizenship and Democratic Values: Terry L. Cooper, Ph.D.

Governor Downey Professor of State and Global Policy: Arnold Schwarzenegger

Frances R. and John J. Duggan Distinguished Professor of Public Administration: Shui Yan Tang, Ph.D.*

Houston Flournoy Professor of State Government: Juliet Musso, Ph.D.*

William M. Keck Professor of Energy Resources: Donald Paul, Ph.D. (Engineering and Earth Sciences)

Dr. Chester A. Newland Professor of Public Administration: Janet Vinzant Denhardt, Ph.D.

Presidential Professor of Health Economics: Daniel McCadden, Ph.D.

Judge Widney Professor: Leonard D. Schaeffer

Judge Widney Professor of Poetry and Public Culture: Dana Gioia, M.B.A

Professors: Marlon Boarnet, Ph.D.; Ann Crigler, Ph.D. (Political Science); Elizabeth Garrett, J.D. (Law); Howard Greenwald, Ph.D.; Eric Hekkila, Ph.D.; Alan Kredit, MCPP; AICP; Dan Mazmanian, Ph.D.; Martin Krieger, Ph.D.; Jacobyln McCreczke, Ph.D. (Social Work); James Moore II, Ph.D. (Engineering); Dowell Myers, Ph.D.; Michael Nichol, Ph.D. (Pharmacy); Gary Painter, Ph.D.; Manuel Pastor, Ph.D. (Geography and African Studies and Ethnicity); Jane Pisano, Ph.D.; Jon Pynoos, Ph.D. (Gerontology); Alison D. Renteln, Ph.D.* (Political Science); David Sloan, Ph.D.; Robert Suro (Journalism); Detlof von Winterfeldt, Ph.D. (Engineering)

Associate Professors: Elizabeth Currid-Halkett, Ph.D.; Annette Kim, Ph.D.; Christian Redfearn, Ph.D.; Peter Robertson, Ph.D.; Lisa Schweitzer, Ph.D.; Jeffrey Sellers, Ph.D. (Political Science); Kathleen Wilber, Ph.D. (Gerontology)

Assistant Professors: Emma Aguila, Ph.D.; Alice Chen, Ph.D.; Kathleen Doherty, Ph.D.; Nicolas Duquette, Ph.D.; Nicole Esperza, Ph.D.; Marco Huesch, Ph.D.; Pamela McCann, Ph.D.; Mark D. Phillips, Ph.D.; William Rersh, Ph.D.; Jenny Schuetz, Ph.D.; Vivian Wu, Ph.D.

Professors (Teaching): Robert Denhardt, Ph.D.; LaVonna B. Lewis, Ph.D.; Dora Vertenten, DPA

Associate Professors (Teaching): Elizabeth Falletta, MRED; Deborah J. Natoli, Ph.D.

Assistant Professors (Teaching): Tara Blanc, Ph.D. (nonresident); William Leach, Ph.D. (nonresident); T.J. McCarthy, Ph.D.; Jennifer Miller, Ph.D.; Kelly Rawlings, Ph.D. (nonresident); Minzi Su, Ph.D. (nonresident); Michael Thom, Ph.D.

Research Professors: Hilda Bianco, Ph.D.; Stephen Hora, D.B.A.; Donald L. Paul, Ph.D. (Engineering and Earth Sciences); Adam Rose, Ph.D.

Research Associate Professors: Michael Cousineau, Ph.D. (Medicine); Christopher Weare, Ph.D.

Research Assistant Professors: John Romley, Ph.D.; Heather Rosoff, Ph.D.; Dan Wei, Ph.D.

Distinguished Fellow: Stan Ross, Honorary J.D.

Professors of Practice: William B. Fulton (Urban Planning); Michael E. Harris (Health Services Administration and Policy); Sherry B. Jeffe (Public Policy Communication); Geraldine Knatz, Ph.D. (Public Policy & Engineering); Mark Pisano (Public Administration); Antonio R. Villarazo (Policy); Frank Zerunyan (Governance)

Adjunct Professors: Janis Breidenbach, M.A.; Jonathan Brown, DPA; Robert Champion, MRED; Thomas Collins, Ed.D.; Rick Culley, Ph.D.; Tim Gage, MPP; Patrick G. Hays, MHA; Lori Howard, Ph.D.; Stanley izman, J.D.; Jong S. Jun, Ph.D.; Patrick Kapsner, MFA, FACPME; Michael Keston, MBA; Allan Kotin, M.A.; Ehud Mouchly, M.A.; Tomson Org, J.D., Ph.D., LLM; James Osterling, MBA; Robert Smythe, B.S.; Errol Souther, MFA; Donna Staal, Ph.D.; Deborah Torres, M.Arch.; Henry Zaretzky, Ph.D.

Adjunct Associate Professors: Aggie Afarinshes, MPA; P.K. Agarwal, M.S.; Austin Anderson, MBA; Deepak Bahl, MBA, MPP; William Barcellona, M.A.; J.D.; Bruce Baltin; Vinayak Bhan, M.Arch.; Sandipan Bhattacharjee, MPh; David Brown, J.D.; Grace Cheng, MSQL; Glenn Daley, MPhil., MBA; Terri Dickerhoff, MPh; Grace Dymace, DPhD; Ali Farahani, Ph.D.; James Fawcett, MPh; Veroncia Flores, M.A.; Melissa Gaake, Ph.D.; Matt Gainer, M.A.; Richard Garcia, DPA; Guillermo Gil, MBA; Todd Gish, Ph.D.; Shawn Godkin, MArch.; Mary Gonzales, Ph.D.; David Grunwald, J.D., MPP; Richard A. Hagy, Ph.D.; Mark Hanson, Ph.D.; Daniel Haverty, DPA; Con Howe, MCP; Donald Huddford, M.D.; Robert Ingenito, M.A.; Bryan Jackson, M.D.; Dion Jackson, MBA, MPh, MRED; Daniel Jordan, Ph.D.; Rym Kaki, Ph.D.; Steven Kellenberg, M.A.U.D.; William R. Kelly, MPA, M.A.; Michael Kodama, M.A.; Kathy Kolinck, Ph.D.; Alon Kraft, MPP; Jeffrey Kreshke, MBA, MRED; V-Nhu Le, Ph.D.; Richard Little, M.S.; Kenneth Long; John Loper, MRED; Melissa Lopez, Ph.D.; Robert Manford, DPhD; Marcella Marlowe, Ph.D.; Carl Meyer, M.Arch.; Ryan Millisap, Ph.D.; Donald Morgan, Ph.D.; Bret Nielsen, MRED; Mark E. Oliver, MRED; P. Michael Paulus, MPA; Katherine Perez, MURP; John Perfit, MBA; John Raffoul, MBA; Maurice Rahimi, Ph.D.; Ann Reyes Robbins, Ph.D., J.D.; Ellen Riley, MBA; Jeanne Ringle, Ph.D.; Shomri Ronen, MBA; Robert A. Saunders, MRED; Jeffrey Schaeffer, MPA; Bonnie Shrewsby, M.A.;
Susan Sinclair, MBA; Krista Sloniowski, MPI; Jeffrey Smith, Ph.D.; Matthew Smith, MREDE; Helene Smookler, Ph.D.; Elwood Tescher, M.Arch; Halli Toros, Ph.D.; Mark Velez, J.D., Ph.D.; Barry Waite, MPA; Jeffrey Wasserman, Ph.D.; Dennis A. Wattsbaugh; Clyde Wesp, M. D.; Chris Wilson, MBA; Jack Wong, M.A.; Ke Ye, Ph.D.; Diane Yoder, Ph.D.

Frances R. and John J. Duggan Professor Emeritus in Public Administration: Chester A. Newland, Ph.D.

Emeritus Associate Professors: Wesley E. Bjur, Ph.D.; Catherine Burke, Ph.D.

*Recipient of university-wide or school teaching award.

Degrees Offered

The Price School of Public Policy offers the following degrees:
- Bachelor of Science in Policy, Planning and Development
- Master of Health Administration
- Executive Master of Health Administration
- Master of Science in Health Systems Management Engineering (with Industrial and Systems Engineering)
- Executive Master of Leadership
- Master of Public Policy and Management
- Master of Planning
- Master of Planning and Development Studies
- Master of Public Administration
- Master of Public Policy
- Master of Nonprofit Leadership and Management
- Master of Real Estate Development
- Doctor of Philosophy in Public Policy and Management
- Doctor of Philosophy in Urban Planning and Development
- Doctor of Policy, Planning, and Development

The Bachelor of Science and the school’s master’s degrees are also offered jointly as a progressive five-year program and the school participates in the following interdisciplinary minors:
- Construction Planning and Management
- Health Policy and Management
- International Policy and Management
- Law and Public Policy
- Nonprofits, Philanthropy and Volunteerism
- Real Estate Development
- Urban Policy and Planning

The Master of Planning is offered as a dual master’s degree with programs in planning, gerontology, Jewish nonprofit management, law and social work. The Master of Public Administration is offered as a dual degree with the Master of Business Administration, Juris Doctor and Master of Planning.

The Master of Health Administration is offered as a dual degree with the Master of Science in Gerontology. The Master of Public Policy is offered as a dual degree with programs in law and planning.

National Honor Societies

Pi Alpha Alpha

Pi Alpha Alpha is the national honor society for public affairs and administration. Graduate students in the Price School of Public Policy who have completed at least 18 semester units and have earned a 3.7 grade point average are eligible for membership.

Pi Sigma Alpha

Pi Sigma Alpha is the national honor society for students in public administration, political science, and international relations. Students who have completed at least three courses from among these fields and have earned at least a 3.5 grade point average are eligible to apply.

Undergraduate Degrees

The Price School of Public Policy offers a suite of degrees that allow undergraduate students to gain the skills and knowledge necessary to understand complex health, environmental and urban issues, as well as to potentially enter the professional fields of health and nonprofit management, public policy, real estate development, and urban planning. Students may enroll in the Bachelor of Science in Policy, Planning, and Development, or a challenging set of minors, or possibly the very competitive progressive degrees associated with the Master of Health Administration, Master of Planning and Master of Public Administration.

Admission

Freshman and transfer students may indicate their desire to declare policy, planning, and development as a major on their university application. Students enrolled at USC wishing to declare the major or to be admitted into the minors must be in good academic standing. Interested current USC students should contact the Admissions and Recruitment Office in RGL 111 for more information.

Advisement

Students must discuss courses of study with the appropriate undergraduate advisers throughout their college enrollment and need to develop their own individual programs with faculty and staff advisers at the time of first enrollment and throughout their college careers.

Bachelor of Science in Policy, Planning, and Development

The Bachelor of Science in Policy, Planning, and Development is an interdisciplinary major that prepares students for graduate study and/or professional careers by engaging them in the analysis of society’s political, social and economic issues in such areas as environment, health care and urban life. The major introduces students to theoretical foundations and practical applications through a set of cross-cutting introductory courses and specialized courses in one of five tracks: health policy and management, public policy and law, nonprofits and social innovation, real estate development, or sustainable planning. Students will be introduced to analytical and research tools, including economics, Geographic Information Systems, statistics, urban design, and applied field research. Throughout, the students’ education will be connected to professional practice, as exemplified by the mandatory internship. Finally, the major is structured to provide students with sufficient elective credits to explore minors or other programs at USC so they can broaden their education to better prepare themselves for the next stage of their lives.

General Education Requirements

The university’s general education program provides a coherent, integrated introduction to the breadth of knowledge you will need to consider yourself (and to be considered by other people) a generally well-educated person. This program requires six courses in different categories, plus writing and diversity requirements, which together comprise the USC Core. See The USC Core and the Requirements for Graduation page for more information.

Major Requirements

A minimum grade of C- (1.7 – 4.0) must be earned in each PPD course specifically listed as a degree requirement. In addition, a minimum grade point average of C (2.0) or higher must be achieved to earn all Price degrees. The GPA for all upper division PPD courses applied toward the major must also be a C (2.0) or higher. No more than 16 units of PPD course work may be taken prior to the successful completion of pre-major requirements.

Pre-major Requirements

A minimum grade of C, 2.0 (A – 4.0), must be earned in each of the pre-major courses.

All pre-major requirements must be taken for a letter grade.

tracks

Students select one track for degree emphasis; they take 28 units (seven courses) from the track selected. Each track includes four required courses and three elective courses. During advisement, students will be given a list of recommended elective courses particularly appropriate for the chosen track, but students have the flexibility to craft the electives out of Price School courses to meet their academic needs. The four requirement courses for each track are listed below.

The faculty director of the undergraduate program may approve students’ petitions to substitute or mix track classes if based on an appropriate academic/career rationale.

**Capstone**

All students will take four units of a capstone experience during their senior year. This may be fulfilled by taking PPD 431, Undergraduate Policy, Planning, and Development Studies (4) or PPD 497aA, Senior Thesis (2-3). Students wishing to enroll in PPD 497aA must have a 3.7 GPA in PPD courses and an overall 3.5 GPA.

**Internships**

Policy, Planning and Development majors are required to complete 140 hours of internship by enrolling in PPD 301, PPD Practices: Internship Seminar or the Washington, D.C., Semester internship. Internships are matched as closely as possible to the student’s interests and skills.

PPD 301 and the internship in a position provide numerous opportunities to develop and formulate future career goals, as well as to gain personal and professional experience while completing the undergraduate degree.

**Honors**

Price School honors are available at graduation to qualified PPD majors and result in a special designation of departmental honors on a student’s transcript. Achievement of PPD honors requires a 3.7 GPA in PPD major courses and a 3.5 overall GPA as well as nomination by the professor in the capstone experience. In addition, students must earn an A in their capstone course (PPD 497aA or PPD 431).

**Washington, D.C., Semester**

The Washington, D.C., Semester program provides an intensive semester of confrontation with the political center of the nation and its complex components. This program offers opportunities for behind-the-scenes work in national government agencies and related organizations, combined with an academic environment and the chance to explore, share and learn with a group of fellow students.

**Progressive Degrees in the Price School of Public Policy**

The Price School of Public Policy offers students who have demonstrated exceptional academic success the opportunity to earn both bachelor’s and master’s degrees in a progressive degree program. This program allows students to earn both the Bachelor of Science and a
master’s degree in five years. Further details about progressive degrees can be found on the Requirements for Graduation page.

Admission

Admission is available after the completion of 64 units of course work toward the undergraduate degree. Students must apply for admission to the progressive degree program after completing 64 units of applicable course work to their undergraduate programs, but prior to the completion of 96 units of course work (not including AP, IB or courses taken prior to high school graduation). The application for admission to the progressive degree plan must be accompanied by a course proposal plan and two letters of recommendation with one at least from a Price School faculty member.

Awarding of Degrees

The Bachelor of Science and master’s degree may be awarded separately upon completion of all degree requirements, but the master’s degree will not be awarded before the bachelor’s degree. Students who elect not to complete the master’s, must complete 128 units to earn the bachelor’s degree, including 12 units of upper division Price course work (including any graduate Price classes).

Time Limits

All requirements for the progressive degree must be completed within 12 semesters. If not completed within that time, students will no longer be eligible for the master’s degree but may still earn the bachelor’s.

Transfer of Credits

Graduate courses will not be accepted for transfer credit. Undergraduate classes may be transferred in accordance with university guidelines.

Minor Programs

Minor in Construction Planning and Management

This program covers the most current theories and practice of construction planning and management. The program provides a valuable adjunct credential to professional school students pursuing careers in business administration, public administration, environmental studies, and other areas; and a unique opportunity for professional focus to students in the USC Dornsife College of Letters, Arts and Sciences.

Construction activities are complex. In contemporary society, effective planning and management of these activities requires specialized knowledge of the technical, economic and political environment. This program couples the knowledge of how construction activities are organized with a broader understanding of the urban system in which construction projects are embedded. With the exception of statistics, all of the required courses are within the Department of Civil Engineering and the Price School of Public Policy.

Any USC undergraduate who has completed the equivalent of two full-time semesters in good standing is eligible to pursue the minor program. This minor program is rigorous enough to serve as an introductory credential for students subsequently electing to pursue advanced studies in development, urban planning, construction management and related fields.

See the Department of Civil Engineering for course requirements.

Minor in Health Administration

This 20-unit minor in health administration provides students with a background in administration and management issues in the field of health care and the skills necessary to pursue health-related management opportunities in the for-profit, nonprofit and governmental sectors.

Required Courses (12 Units)

- PPD 320 Organizational Behavior in Health Care Management 4
- PPD 325 Fundamentals of Health Policy and Management 4
- PPD 330 Introduction to Health Care Systems 4

Electives (6 Units)

- PPD 316 Human Resources Management for Public Organizations 4
- PPD 318 Financial Accounting in Public and Nonprofit Organizations 4
- PPD 407 Financial Management of Public and Nonprofit Organizations 4
- PPD 413 Administration of Health Care Organizations 4

Minor in Health Policy

This 16-unit minor in health policy provides students with a background in the policy issues and challenges globally, nationally and locally related to quality, cost and access to health care. Students in this minor will acquire an understanding of these issues and the skills required to influence health policy.

Required Courses (12 Units)

- PPD 325 Fundamentals of Health Policy and Management 4
- PPD 330 Introduction to Health Care Systems 4
- PPD 415 Health Policy 4

Electives (4 Units)

- GERO 416 Health Issues in Adulthood 4
- HP 422 AIDS in Society 4
- PPD 414 Community Health Policy and Planning 4

Minor in International Policy and Management

The minor in international policy and management brings together courses from the School of International Relations, dealing with the new global challenges, specific regions of the world, and international organizations and policies, and the Price School of Public Policy, dealing with core management skills and public policy processes. Students will examine the changes and challenges, which are transforming the world, and the policy and management skills used to deal with them. To increase their understanding of the context and application of these concepts, students must complete a semester-long internship either in Washington, D.C. (through participation in the Washington, D.C. semester program) or in Los Angeles with an organization that has an international focus.

Students minoring in international policy and management take three courses in international relations, including the gateway course, IR 305 Managing New Global Challenges; three courses in public policy and management; and an approved internship through the School of International Relations (IR 491 Field Study). For additional course information, see International Relations.

Minor in Law and Public Policy

The minor in law and public policy draws upon four fields of study: public policy and management, law, economics and political science. It provides students with an understanding of the political and economic contexts in which laws are made as well as how legal institutions shape policy formulation. Students learn to analyze the consequences of policy and alternatives; the roles played by government, business and nonprofit organizations in public decision making; and the legal bases for various areas of public policy.

Students minoring in law and public policy take six required courses, including the gateway class, PPD 225 Public Policy and Management, and one elective. The latter enables the student to focus on a specific area of law.

Required Courses

- ECON 303 Principles of Microeconomics 4
- LAW 200x Law and Society 4
- POSC 340 Constitutional Law 4
- PPD 225 Public Policy and Management 4
- PPD 303 Statistics for Policy, Planning, and Development 4
- PPD 373* Public Policy and Planning Analysis 4

And one of the following:

- ECON 434 Economic Analysis of Law 4
- FBE 403 Introduction to the Legal Environment of Business 4
- POSC 345 International Law 4
- POSC 347 Environmental Law 4
- POSC 422 The Politics of Local Criminal Justice 4
- POSC 440 Comparative Law and the Judicial Process 4
- POSC 441 Cultural Diversity and the Law 4
- POSC 444 Civil and Political Rights and Liberties 4
- POSC 452 Critical Issues in Law and Public Policy 4
- PPD 314* Public Policy and Law 4
- PPD 315* Analytic Foundations for Public Policy 4

*Prerequisite required

Minor in Nonprofits, Philanthropy and Volunteerism

This four-course minor enables students to learn about the nonprofit sector — its organizations, philanthropy and voluntary action. The three course core provides: (1) an overview of the nonprofit sector and philanthropy and its role in the United States, including its historical and theoretical foundations, its various components and its relation to public policy; (2) a focus on voluntary action and service as one means for social change and problem-solving; and (3) insights into the management of nonprofit organizations. Students select an elective that extends their understanding to the role of nongovernmental organizations in international affairs or to the role of public relations for nonprofits.

This minor is intended for students who plan (1) to work in a nonprofit or charitable organization, whether it is a large organization such as United Way, a small social service agency, an environmental advocacy group, a museum or a religious organization, (2) to participate with nonprofits as a volunteer throughout their lives or (3) pursue further graduate work in a service-related profession.

Required Courses

- PPD 371 The Nonprofit Sector and the Public Interest 4
- PPD 402 Management of Public and Nonprofit Organizations 4
- PPD 478 Social Innovations 4

Electives (Select one)

- BUCC 425 Business Communication Management for Nonprofits 4
- JOUR 455 Public Relations for Non-Profit 4
Minor in Real Estate Development

This minor provides students with an overview of the field of real estate development — its principles, market analysis, finance and history, as well as the opportunity to pursue more specialized interests and skills through a set of electives (including courses in architecture, civil engineering and business). It is a 23-24 unit minor, requiring four core courses and two electives. The minor is intended for any students with interests in careers in real estate development or other areas that might be related to real estate development, such as local government, non-profit housing and land use enterprises, urban economics, public-private partnerships or related entrepreneurial ventures.

Minor in Urban and Sustainable Planning

The 24-unit minor in urban policy and planning focuses on the application of public policy, urban planning and public management to the analysis and solution of urban problems. It draws upon the interdisciplinary faculty and programs of the Price School of Public Policy and includes foundational courses that introduce students to the nature of urban phenomena and the analysis and solution of urban problems. The minor also introduces students to the professional and academic fields of either urban planning and development or public policy and public management. In addition, based on their specific interests, students have the opportunity to explore in greater depth three areas and approaches of urban problem-solving. This minor is appropriate for students interested in expanding their understanding of the fields of urban planning and public policy and management as potential professional careers as well as increasing their comprehension of the analysis and solution of urban problems.

Required Courses (16 units)

- PPD 227: Urban Planning and Development (4 units)
- PPD 245: The Urban Context for Policy and Planning (4 units)
- PPD 427L: Geographic Information Systems and Planning Applications (4 units)
- PPD 461: Sustainable Communities, Policy and Planning (4 units)

Elective Courses (8 units)

- Students select two courses from this list. They are encouraged through advisement to consider course clusters that reflect special interests.

Aerospace Studies

**Physical Education Building 112 (213) 740-2870**

**Administration**

Sean C. Marler, M. Ed., (Lieutenant Colonel, USAF)

**Faculty**

Professor: Sean C. Marler, M. Ed., (Lieutenant Colonel, USAF)

Assistant Professors: Casey Whiston, B.S., (Captain, USAF); Matthew Stewart, B.S., (Captain, USAF)

**The Department of Aerospace Studies offers a three to four-year program of instruction leading directly to commissioning as an officer in the United States Air Force. To obtain a commission, qualified students must pass an aptitude test, physical fitness assessment and a medical examination; complete the aerospace studies program of instruction and concurrently receive an undergraduate or graduate degree. Credits earned in aerospace studies courses may be counted as electives in some degree programs. Those students who qualify for and are selected to enter Air Force pilot training will be given flight instruction upon graduation. Qualified applicants may compete for a variety of Air Force scholarships, some of which pay full tuition, books and associated fees. USC also offers a matching $4,000 scholarship per year for all AROTC scholarship recipients. See the Tuition and Fees page for additional scholarship information.**

**Program Requirements**

**Academic Year Program**

This program consists of up to eight semesters of aerospace studies courses (AEST 100ab through AEST 400ab) plus a four-week summer field training course. Students enroll in the first four semesters of aerospace studies (AEST 100ab and AEST 200ab) in the same manner as in any other course of instruction at USC. Students will be considered on a competitive basis to attend the summer field training course and enroll in the final four semesters (AEST 300ab and AEST 400ab). The program can be tailored for students who join after the beginning of their freshman year.

Summer Training Courses

Field training is offered during the summer at Maxwell Air Force Base in Montgomery, Alabama. Students participate in four weeks of intensive training, normally between their sophomore and junior years.

The major areas of study in the field training course include junior officer leadership training, career orientation, survival training, weapons training, physical training, base functions and the Air Force environment.

Additional summer training courses at locations around the world are available to interested students to build leadership and human relations skills, develop cultural and language proficiency, provide a general orientation in Air Force specialties and motivate cadets toward an Air Force career. The training opportunities vary each year but may include cultural and language immersion programs, engineering research and apprenticeships, and orientation programs related to other air, space and cyberspace specialties.

**Military Science**

**Physical Education Building 110 (213) 740-4026**

**Administration**

Justin M. Chezem (Lieutenant Colonel, U.S. Army)

**Faculty**

Professor/Commander: Justin M. Chezem (Lieutenant Colonel, U.S. Army)

The Department of Military Science provides professional training for students leading to a commission, upon graduation, in the Active Army, Army Reserve or the Army National Guard. Through the Army Reserve Officers’ Training Corps Program (AROTC), scholarship benefits include full tuition, fees and book stipends. Scholarships are also available for Guaranteed Reserve Forces Duty. Military science instruction is focused on hands-on leadership development and the practical application of military skills needed to produce America’s future leaders. Additionally, military science courses count as electives in many degree programs. M$101 and M$102 are open to students who are not enrolled in the program, but have an interest in leadership, management, military history or military training. Enrollment in the Army ROTC program is open to qualified full-time students.

**Scholarship Program**

The majority of Army ROTC cadets attend USC on Army scholarships. All Army scholarships are merit-based and are not dependent on individual financial need.

Scholarships are available for both Active Duty and Guaranteed Reserve Forces Duty. Scholarships are awarded on a competitive basis to qualified applicants for two-, three- or four-year periods depending on the applicant’s academic level and program of study. Scholarship cadets receive benefits that cover full tuition, fees and a book stipend, and are available to all majors. See the Tuition and Fees page for additional scholarship information.

**Enrolled Cadets**

Contracted scholarship and non-scholarship cadets can receive a monthly stipend subsistence allowance, based on academic class. Contracted scholarship cadets receive an annual book allowance. All enrolled scholarship and non-scholarship cadets receive uniforms and military science textbooks from the department.
Four-Year Program
The four-year military science curriculum is designed to be part of the student’s undergraduate degree program. During the freshman and sophomore years, students receive introductory instruction in the theory of warfare, military history, military leadership and basic military skills. Cadets participate during their junior and senior years in a professional development program with instruction in leadership, management, military justice and advanced military skills.

Three-Year Program
The three-year program is available to qualified sophomores and senior undergraduate students. Students may compress the first two years of the ROTC program by attending two ROTC classes per semester during their sophomore year. Scholarships are available, on a competitive basis, for students with three years remaining toward the completion of their undergraduate degree.

Transfer students who meet the same criteria are also eligible for scholarships. Upon acceptance, students then follow the military science program described for the four-year program.

Two-Year Program
The two-year program is available to qualified junior and senior undergraduate students and graduate students who have two years of academic work remaining. Veterans who have achieved junior academic status and meet enrollment criteria are also eligible for this program. Students may receive credit for the first two years of the ROTC program by attending the ROTC Leaders Training Course or by prior junior ROTC participation. Transfer students who meet the same criteria are also eligible for scholarships. Upon acceptance, students then follow the military science program described for junior and senior cadets in the four-year program.

Field Training
Several military training programs are available to qualified cadets. A five-week paid Leaders Training Course at Fort Knox, Kentucky, qualifies students for the two-year program. All cadets attend a 32-day paid ROTC Leadership Development and Assessment Course at Fort Lewis, Washington, after their junior year. This course provides practical application of advanced military and leadership skills required for commissioning.

Adventure Training
Qualified candidates may also receive training in Airborne school, Air Assault school (rappelling from helicopters), Cadet Troop Leadership Training (training in Army units around the world), Northern Warfare school (Arctic survival) and Mountain Warfare school.

Naval Science
Physical Education Building (PED) 101 (213) 740-2463

Administration
Jonathan Hitesman, B.S., J.D., LLM (Colonel, U.S. Marine Corps), Commanding Officer

Faculty
Professor: Jonathan Hitesman, B.S., J.D., LLM (Colonel, U.S. Marine Corps)
Associate Professor: Julito Antolin, B.S., M.A. (Commander, U.S. Navy)
Assistant Professors: Mark E. Burrell, B.S. (Major, U.S. Marine Corps); Raymond A. Hill IV, M.S. (Lieutenant, U.S. Navy); Phillip Foster, B.S. (Lieutenant, U.S. Navy); Lou Alvarez, B.S. (Lieutenant, U.S. Navy)

The Department of Naval Science provides professional training for undergraduate students (midshipmen) leading to a commission, upon graduation, in the United States Navy or the United States Marine Corps. Through the Naval Reserve Officers Training Corps Program (NROTC), scholarship students receive full tuition, fees, book stipend and $250–$400 per month subsistence allowance. The university also provides an additional automatic scholarship of $4,000 per year for each NROTC scholarship recipient. Non-scholarship students may apply to participate as members of the midshipman battalion with limited financial assistance, earning a commission upon completion of the baccalaureate degree. Because of the rapid development of highly technical ship systems, aviation and other military equipment, the majority of Navy scholarships are awarded to science and engineering majors; however, limited Navy scholarships and all Marine Corps scholarships are currently available to students pursuing any major offered by the university, as long as they complete basic technical requirements. In addition to university requirements, midshipmen must complete 12–15 units of naval science courses, a physical fitness test and three active duty summer training sessions, each about three to six weeks long.

All naval science courses are open to students who are not in the program but have an interest in the Navy and Marine Corps related fields, such as engineering, navigation, amphibious warfare, naval operations, history and leadership/management.

Program Requirements
Scholarship Program
The majority of naval science students attend the university on Navy or Marine Corps scholarships. Scholarships are awarded primarily on a four-year basis to high school seniors selected in nationwide competition. Two- and three-year scholarship programs are also available with a similar selection process. In addition to tuition and fees, books and uniforms, students receive subsistence allowance of $250–$400 per month. Navy Option midshipmen later will be required upon graduation to serve a minimum of five years of active military service. Additional requirements may be required for specific job assignments. The NROTC program only commissions Naval officers into the following communities: Aviation (pilot or naval flight officer), Submarine Warfare, Surface Warfare, Special Operations (Explosive Ordinance Disposal), Special Warfare (SEALS) or Medical/Dental Corps.

College Program
Students may join NROTC as non-scholarship "College Program" students. These students receive uniforms and participate as regular midshipmen in the program but do not receive scholarship or stipend funds or attend summer training. College Program students must complete and be selected for a two- or three-year scholarship or be placed in an "Advanced Standing" status in order to continue in the program and receive an active duty commission.

Marine Corps Option
The Marine Corps option prepares midshipmen for service as second lieutenants in the United States Marine Corps. Marine Option Midshipmen must successfully complete Officer Candidate School (OCS) in order to earn their commission. This intensive 6-week course is completed during their final summer training session. Marine Corps Option students also participate, on a limited basis, in local field training exercises during the academic year. Marine Corps Option midshipmen will be required upon graduation to serve at least four years on active duty.

Requirements for Commissioning
Students must meet USC degree requirements in their chosen fields and complete the prescribed naval science courses and Professional Laboratory (PROLAB). In addition, Navy scholarship students must include in their programs MATH 112, Calculus I and MATH 126 Calculus II and PHYS 151L Fundamentals of Physics I: Mechanics and Thermodynamics and PHYS 152L Fundamentals of Physics II: Electricity and Magnetism; two courses of English, one course in American history/national security policy and one course in language or culture.

More detailed program information and the online application process is available at: nrotc.navy.mil/index.aspx. The USC NROTC Website is usc.edu/dep/rotc.

Graduate Degrees
Admission
Applicants for admission to the Master of Health Administration; Master of Nonprofit Management and Leadership; Master of Planning; Master of Planning and Development Studies; Master of Public Administration; Master of Public Policy; Master of Public Policy and Management; Master of Real Estate Development; Doctor of Policy, Planning, and Development; Doctor of Philosophy in Public Policy and Management; and Doctor of Philosophy in Urban Planning and Development must have a bachelor’s degree or its equivalent from an accredited educational institution, in recognition of the increasing diversity of capabilities required as the theories and practices of policy, planning, and development evolve, students from a variety of undergraduate and graduate backgrounds are encouraged to apply.

Applicants for admission will be expected to have completed a broad range of undergraduate courses in addition to their academic major or professional concentration. Generally, this will be reflected in completion of courses from the following fields: English; economics (basic theory); political science, history or sociology; physical or natural science; art or philosophy. In addition, mathematics (algebra, calculus, probability theory) and a course in statistics are strongly recommended.

Application for Admission
Admission to graduate programs in the Price School of Public Policy is highly selective and competitive. Preference is given to those with a record of high educational achievement and personal qualities favoring success in the fields of planning or development. Applicants must have achieved superior grades during undergraduate and any graduate education. A grade point average of at least 3.0 (A = 4.0) is normally expected as well as satisfactory scores on the Graduate Record Examinations (GRE). The GRE and GMAT are neither accepted nor required for the DPPH or executive MHA programs. Students applying for admission to the Master of Nonprofit Management and Leadership, Master of Planning, Master of Planning and Development Studies or the Master of Real Estate Development program may submit results from the Graduate Management Administration Test (GMAT). MRED applicants may also submit results from the Law School Admission Test (LSAT). In exceptional cases, an applicant who has not met these scholarship requirements may be admitted with conditions of admission.

For specific information on admission requirements and application procedures, contact the Price School of Public Policy, Office of Recruitment and Admissions, at
Master of Health Administration

The issues surrounding the delivery and financing of health services have an enormous impact on individuals and the communities in which we live. The health care industry now accounts for more than 15 percent of the U.S. economy. Fast-moving developments in technology, economics, ethics, finance, policy, management, and globalization are driving changes in the health sector. Effective health leadership requires an understanding of governance systems and the complex interplay between the public, private, and nonprofit sectors as well as the dual imperatives of both the clinical and business facets of health care delivery. As the health care system changes, career opportunities abound. The field has a tremendous need for leaders, managers, and analysts — in hospitals, health plans, physician practices, health-related enterprises, community health organizations, social advocacy groups, and regulatory and legislative agencies.

The Price School of Public Policy’s multidisciplinary nature, with degree programs in public policy, public administration, urban planning, and international policy, adds breadth that distinguishes USC’s MHA degree, providing students with an understanding of the larger social context in which the health sector is embedded and how it intersects and interacts with other social policy issues.

The Price School programs in health management and policy offer two degree options — the Master of Health Administration and the Executive Master of Health Administration. These degree programs provide the knowledge, skills, and applied experience to shape health policy and lead health organizations.

Requirements for Admission

General

Applicants must have a bachelor’s degree from an accredited college or university. Applicants may take courses on limited standing pending formal admission to the master’s degree program.

Applicants with bachelor’s degrees must have a minimum grade point average of 3.0 in their undergraduate course work and a score of at least 500 on the verbal and at least 500 on the quantitative sections of the GRE. Deviations from these minimums will be allowed when justified by exceptional work experience, letters of recommendation or improvement in academic performance during the third and fourth years of undergraduate study.

Prerequisites

Statistics

A basic competence in descriptive and inferential statistics is also required for the MHA program. The statistics prerequisite must be satisfied within the first 12 units or before enrolling in PPD 557 Modeling and Operations Research. This prerequisite may be met in one of two ways: (1) entering students must have passed an undergraduate inferential statistics course, with a grade of “B” or better, at an approved university within three years of matriculation, or (2) completing PPD 502x Statistical Foundations for Public Management and Policy with a grade of “B” or better (this course credit may not count toward the MHA degree).

Limited Status Students (Preadmission)

Students taking courses who have not been admitted to the school are designated limited status students. These students may be waiting for part of their application package materials to arrive; or they may be investigating whether an MHA may be right for them.

To be considered for limited status reenrollment, interested students need to complete the Price School of Public Policy Limited Student Application for Enrollment form and submit official or unofficial copies of their transcripts from their bachelor’s degree granting institution. Students with a 3.0 grade point average (A = 4.0) may enroll in up to 8 units of graduate courses in the Price School of Public Policy.

Price School of Public Policy Limited Student Application for Enrollment forms may be obtained from the Admissions Office, USC Price School of Public Policy, University of Southern California, RGL 111, Los Angeles, CA 90089-0626, telephone (213) 740-6842. Limited students may only enroll during the in-person registration period (the week before classes begin).

Limited status students may apply only 8 units of appropriate graduate work toward the MHA after admission. Units beyond these first 8 must be petitioned for through the school. Students on limited status are encouraged to complete the application and admission process before completing these first 8 units.

Certificate Program

Information regarding the Certificate Program in Health Management and Policy Programs can be found on the Graduate Certificates page.

Curriculum

Curriculum for the MHA includes 48 units (40 required units and 8 elective units). In addition, a supervised field placement (residency) in a health service organization is required. The MHA degree is designed to be completed in two years of full-time study, but can be extended for those who work while going to school. Evening classes and classes that meet in an intensive, workshop format of two to four sequential days of training are designed to accommodate working professionals.

Graduate Degrees

(213) 740-0550. Certificate in Transportation Systems applicants should apply to the USC Viterbi School of Engineering. For additional information, contact the school at (213) 740-0557.

Transfer Credit

The Degree Progress Department determines whether work done elsewhere is available for consideration for credit toward the USC degree. That office requires official transcripts of all course work done before entering USC. A Graduate Transfer Credit Statement of these official transcripts, done after a student has been admitted to regular status at USC, will indicate which units are available for transfer. These courses do not apply toward the degree unless, and until, the student’s major department approves and submits transfer credit to the Degree Progress Department in the Office of Academic Records and Registrar.

Application of any available transfer credits toward a graduate degree will be determined by the director of the particular degree program, based on the semester units available for transfer as shown on the Transfer Credit Statement.

These general guidelines are followed by the admissions evaluator and by faculty members: (1) the work must be completed at an accredited graduate school; (2) the grade must be B or better; (3) the work must be a fair and reasonable equivalent to current USC course work at the graduate level which fits into the logical program for the degree; (4) the units are not more than seven years old at the time of admission to their master’s program (or 10 years old for a doctoral program); (5) the units must reflect current knowledge in the field; and (6) the work must be completed prior to admission to the USC program.

USC does not give transfer credit for life experience, credit by examination, noncredit extension courses or thesis course supervision.

Please consult with your degree director before enrolling in courses outside of USC. In many of the Price School’s master’s degree programs, only courses taken outside of USC prior to admission may be applied to your degree.

Waiver of Course Content

The school recognizes that some applicants may have covered the material contained in core courses or courses required for a particular specialization. Under these circumstances, one particular course requirement may be waived, allowing the student to complete a more advanced course in the same area. Students who have a background in a particular area of study may be allowed to substitute other courses. In these situations students do not receive unit credit but are permitted to take course work, which does not repeat earlier academic experiences.

Waiver of content is usually given only in the case of previous academic study of the subject, not in the case of experiential background in the area.

Students who believe they are eligible for content waiver decisions must petition the faculty of the school, providing evidence of the previous work through transcripts, syllabi and other pertinent material. Contact the school’s Student Affairs Office for information.

Required Core (40 units)
Executive Master of Health Administration

The Executive MHA Program offers clinical and management professionals an opportunity to advance their careers in health care and to more effectively improve health services within their communities. Mid- to senior-level professionals who have the ambition and potential to serve as industry leaders in the highly dynamic and competitive health care environment are encouraged to consider the Executive MHA degree. The Executive MHA is geared to those who have demonstrated capabilities, yet who will benefit from expanded skills and competencies that will enable them to lead.

Participants sharpen their business acumen by gaining exposure to in-depth knowledge of the latest theories and the best in contemporary health management practice. A practical, problem-solving approach ensures that skills can immediately be applied on the job.

Requirements for Admission

Applicants for the Executive Master of Health Administration apply directly to the program. A minimum of five years of experience with progressively greater levels of responsibility in health care or a related field is required for entry into the Executive MHA program. Applicants must have earned a bachelor’s degree from an accredited college or university. A minimum grade point average of 3.0 in undergraduate course work is required. Allowing may be made when justified by exceptional work experience and letters of recommendation.

Prerequisites

Accounting

A basic competence in accounting is required for the Executive MHA program. The accounting prerequisite must be satisfied before enrolling in HMGT 516 Managing the Organization’s Financial Health. This prerequisite may be met in one of three ways: (1) completing the non-credit Executive MHA accounting workshop with a passing score; (2) demonstrating prior work experience or (3) completing prior course work at an accredited academic institution in accounting and finance.

Curriculum

The Executive MHA offers a hybrid online/in-residence executive education program that will prepare the graduate to meet career objectives. The program provides students with the flexibility to meet program requirements while maintaining full-time administrative positions, but also emphasizes the importance of an integrated approach to executive education. In addition to the synchronous and asynchronous learning modules included in each course, students will participate in five-day, in-residence sessions at the University Park Campus twice during the program. The first in-residence session will occur before the midpoint of the program, and the second session will be a capstone experience in the last semester of the program. The Executive MHA degree program does not require a supervised field placement (residency) in a health care organization.

The curriculum of the EMHA is organized around five themes: thriving in transformational times through innovative leadership; delivering cost-effective care in an era of value-based purchasing; providing efficient management and administration; developing and implementing strategies to enhance patient safety and quality of care; and demonstrating organizational and clinical effectiveness through health information technology. These integrated themes and the associated content provide graduates with a comprehensive approach that expands their understanding of the key principles and applications necessary to function in a senior administrative leadership role.

Executive Master of Leadership

The Executive Master of Leadership Program offers professionals from a variety of fields including public administration, public policy, planning, law enforcement, transportation and other public, nonprofit and business organizations, with at least five years of professional experience, the opportunity to build leadership skills at five levels: individual, team, organizational, community and institutional. The program design offers participants insight into the mechanisms that facilitate effective personal and organizational networks, as well as collaborative problem-solving strategies and practices.

The program follows a cohort model for the four required core courses. The degree curriculum has three distinguishing features: a design to connect ethics with leading through core values; an interdisciplinary and multidisciplinary problem-solving approach; and transformational leadership that connects the public, private and nonprofit sectors.

Requirements for Admission

Applicants for the Executive Master of Leadership Program apply directly to the program. A minimum of five years of experience with progressively greater levels of responsibility is required for entry into the program.

Candidates for admission must have earned a bachelor’s degree from an accredited college or university with a minimum 3.0 grade point average. Exceptions to the minimum GPA requirement may be made when justified by exceptional work experience and letters of recommendation.

Applicants must submit a standard USC graduate application and fee along with official transcripts from all undergraduate and graduate institutions attended. Letters of recommendation, a current resume, an essay and an interview will also be required.

Degree Requirements

Organizations

PPD 516 Financial Accounting for Health Care Organizations 4
PPD 517 Concepts and Practices in Managing Health Care Organizations 2
PPD 518 Quality of Care Concepts 2
PPD 545 Human Behavior in Public Organizations 4
PPD 557 Modeling and Operations Research 4

Electives

In addition to the 40 required units, students are required to take 8 units of electives. Elective courses will be taken in two of the five specialization areas: management/operations/leadership; health policy analysis; health finance; health information technology; and health care quality. The two specializations will be selected by the student with the advice and written consent of the MHA program director and faculty adviser.

Residency

The MHA student is required to complete a 1,000 hour residency at a health care organization, generally during the second year of study. This residency may be reduced, but must include at least 500 hours, depending on the health care experience of the student. The residency is designed to provide the student with practical administrative experience that complements program course work.

Executive Master of Science in Health Systems Management Engineering

This program is jointly sponsored by the Epstein Industrial and Systems Engineering Department and the Price School of Public Policy, and administered by the Epstein Industrial and Systems Engineering Department. This degree is designed for students with sufficiently quantitative bachelor’s degrees in engineering, the sciences or applied social science who are interested in operations management and health care applications, and whose career objectives lead to increasing technical management responsibilities in large health care organizations, particularly hospitals. Students with less quantitative social science or other non-technical backgrounds interested in health administration objectives may also want to consider the Master of Health Administration program in the Price School of Public Policy. For information, see Industrial and Systems Engineering.

Master of Science in Health Systems Engineering

Lewis Hall, Room 307, Price School of Public Policy, (213) 740-2984, email: emha@usc.edu.
Students are required to complete 28 units of graduate work — 16 units of required core courses and 12 units of electives.

**Required Core Courses (16 Units)**

**Electives**

In addition to these 16 required units, students are required to take 12 units of electives.

Elective courses will be selected in consultation with the faculty adviser based on the student’s individual learning/development plan. Students will choose these electives in order to concentrate in a particular area of study. The following are examples of concentrations that are available: Government or nonprofit organization management, urban planning, transportation, public policy, and political management. The Price School of Public Policy offers a wide range of electives to students each semester.

**Master of Nonprofit Management and Leadership**

The Master of Nonprofit Management and Leadership (MNLM) program is designed to prepare students to distinguish themselves as leaders in the nonprofit sector whether managing nonprofits, advocate for social change or developing and implementing innovation solutions to social problems.

**Degree Requirements**

Students are required to complete 42 units of graduate work, with 12 units of core organized under three areas: theory and context, leadership and management, and analytical skills and 8 elective units based on their interests.

**Note:** 2-unit courses may be offered in seven-and-a-half week blocks.

**Planning Studios**

Planning studios are an integral part of the curriculum of the Price School of Public Policy, providing the essential educational link between academic education and preparation for professional practice. The planning studios require that students learn to work together as a team by applying their respective capabilities and knowledge to a real-world common problem and to produce a professional project. Students must complete 8 units of domestic or international planning studios under PPD 531L (4) to satisfy this requirement. A maximum of 12 units may be taken.

Local agencies, communities and firms often sponsor planning studios to obtain research and analysis. Community groups seek assistance as a means of informing themselves more thoroughly on community problems and issues or for obtaining planning analysis otherwise unavailable to them. The products of planning studios are usually in the form of policy recommendations, a suggested plan or alternative plans, databases, background information, base maps, or any one of many specific contributions.

MPl planning studios can either be situated in the United States or around the world. Past courses have examined the tragedy around Katrina in New Orleans, developed economic development plans for local Southern California cities, and studied changing public spaces in Germany.

Price International Laboratories (PPD 613ab) can be taken as an elective in the MPl program. The program strongly encourages students to enroll in one laboratory during their course of study. In recent years, Price lab courses have been offered in China, Brazil and England.

**Concentrations (16 units)**

Students must declare their concentration during the fall semester prior to taking the comprehensive examination in the spring semester. Students are required to complete the gateway course and methodology course related to their concentration as part of their preparation for their comprehensive examination. The student’s concentration must contain a 4-unit methodology course, a 4-unit gateway course and 8 other units. At least 12 of these units must be selected from Price School curriculum. Courses outside the Price School should be selected by the student with the approval of an academic adviser and must be directly concerned with the subject matter of the concentration.

After students register, the faculty will provide them with a series of specializations they may take in association with the concentrations. These specializations are not required; they are provided as guidance for students interested in these subject areas. The specializations vary. Some suggest ways that students can more deeply study a single area within planning, while others provide a broad overview of planning and policy issues. The specializations draw upon courses within the MPl program, the Price School sister programs and courses from other USC units.

**Economic Development**

Economic Development is the basis for prosperous community development. Job creation and the development of service or employment sites are the core of economic development. At a higher geographical scale, development of regional economies provides a focus for planning in an international context. Suggested courses...
for students selecting this concentration include PPD 622, PPD 624, PPD 625, PPD 626, RED 509 and RED 542.

**Preservation and Design of the Built Environment** addresses the architecture of the city, viewed not as a series of individual buildings, but as a set of visual and functional connections between buildings on a street front or in a district. In contemporary settings, planning and construction do not begin with a blank slate. Rather, new structures are inserted into an existing built environment, which must be respected for its historical heritage and its contributions to the new. Students in this concentration are encouraged to draw from courses related to landscape architecture and historic preservation in the School of Architecture. Suggested courses for students selecting this concentration include PPD 530, PPD 615, PPD 618, PPD 619, PPD 623, PPD 631 and PPD 652.

**Social and Community Planning** gives specific attention to the changing needs of neighborhood residents and to the ways in which different planning policies, programs and activities contribute to resident well-being. Community planning is a process of organizational change that links residents and services to produce communities that are safe, healthy and socially connected. Achieving these goals demands that residents actively advocate for their communities. Suggested courses for students selecting this concentration include PPD 606, PPD 617, PPD 618, PPD 619, PPD 620, PPD 621, PPD 618 and PPD 690.

**Sustainable Land Use Planning** centers on community land use planning in the context of regional growth or decline. The planning process involves forecasting transportation needs, population growth and housing needs, together with providing comprehensive planning to accommodate that growth in a way that preserves and enhances local quality of life. Envisioning better futures, livability, environmental protection accessibility, mobility and affordable housing production are all part of smart growth strategies for sustainable regional growth. Suggested courses for students selecting this concentration include PLUS 611, PPD 615, PPD 618, PPD 620, PPD 621, PPD 627, PPD 631, PPD 693 and PPD 694.

**Transportation and Infrastructure Planning** is the combination of vital functions that determine the efficiency and productivity of a city. Issues of access and mobility of urban residents must be addressed. Circulation of workers from home to workplace, and of residents to shopping and services, are fundamental determinants of land use and urban form. Students in this concentration acquire mastery of the basics of transportation analysis with an emphasis on analysis of different policies that serve transportation and infrastructure needs within urban areas. Suggested courses for students selecting this concentration include PPD 657, PPD 588, PPD 589, PPD 621, PPD 630, PPD 631, PPD 635 and PPD 692.

**Concentration Gateway Courses**

Students are required to complete their gateway course prior to participating in the comprehensive examination. The following courses are required for their concentration:

- **Economic Development:** PPD 639 Introduction to Community and Economic Development
- **Preservation and Design of the Built Environment:** PPD 644 Shaping the Built Environment
- **Social and Community Planning:** PPD 628 Urban Planning and Social Policy
- **Sustainable Land Use Planning:** PPD 619 Smart Growth and Urban Sprawl: Policy Debates and Planning Solutions
- **Transportation and Infrastructure Planning:** PPD 634 Institutional and Policy Issues in Transportation

**Concentration Methodology Courses**

Students are required to complete one methodology course related to their concentration. Students are encouraged to complete a second methodology course among their electives. The following courses are required for their concentration:

- **Economic Development:** PPD 645 Planning and Economic Development Finance
- **Preservation and Design of the Built Environment:** PPD 627 Design Skills for Urban Planners
- **Social and Community Planning:** PPD 616 Participatory Methods in Planning and Policy
- **Sustainable Land Use Planning:** PPDE 634 Methodology, Methods and Tools for Urban Sustainability
- **Transportation and Infrastructure Planning:** PPD 633 Urban Transportation Planning and Management

**Comprehensive Examination**

Successful completion of a comprehensive examination is required of each student seeking the Master of Planning degree (except for students pursuing the dual degree with either economics or geonology). Students pursuing the dual degree with real estate development can choose the MPI or MRED examination. The comprehensive examination integrates accumulated lessons of the core courses and planning studios. Students are also expected to utilize material covered in their concentration and electives.

The comprehensive examination is given only in the spring semester of each year. Students usually take the examination in the last semester of their second year. Students must declare their concentration during the fall semester prior to completing the comprehensive examination in the spring semester. They must have completed the gateway and methodology courses in the declared concentration prior to taking the comprehensive examination.

The MPI Program degree committee administers the comprehensive examination. Examinations are graded on a pass/fail basis. Students who fail the examination may take it a second time the next year. The examination may only be repeated once.

**Planning Electives**

Students are encouraged to select electives related to their course of study. A Price International laboratory course is especially encouraged.

**Internship**

Students working toward the Master of Planning degree must complete an internship of at least 10 weeks duration and 400 hours in an organization engaged in planning or a closely related activity. Students must submit a report to the director of career services describing and evaluating the internship experience. Arrangements must also be made for an evaluative report of the internship by the student’s supervisor submitted directly to the academic adviser. The internship is not for unit credit.

Students often fulfill their internship while working part-time in a planning-related job during their course of study in the program or in the summer between the two academic years. If a student has had equivalent career experience prior to admission to the program, the MPI director may waive the internship requirement on the recommendation of the student’s academic adviser.

The Price Office of Career Services actively works with school alumni and area planning organizations to assist students in obtaining appropriate internships. Numerous internship opportunities are available in the greater Los Angeles area. The student is responsible for securing the internship and fulfilling the requirement.

**Direct Research**

With the advice of the faculty, a student may elect to enroll in directed research as an elective. Working directly with a faculty member, the student pursues an interest or problem appropriate to the student’s program of study.

The faculty member supervising the student must approve the final product of directed research. The final product may be a written report, article, graphic formulation, physical model, mathematical-statistical analysis, computer output or film — depending on the most appropriate expression of the research undertaken.

**General Requirements**

**Residence and Course Load**

The Master of Planning normally requires two academic years of full-time study. Courses are also scheduled to allow completion on a part-time basis. At least 36 units of graduate-level study must be done in residence at USC. The residency requirement may not be interrupted without prior permission from the Price School of Public Policy. Students accepted into the program with academic deficiencies will require a correspondingly longer time to complete their course work. Students seeking the degree on a part-time basis must take at least one course each semester.

Students must be enrolled at USC for the fall and spring semesters each year until all degree requirements have been met. Students who find it necessary to be excused from a semester of registration must request a leave of absence from the Academic Programs Office by the last day to drop/add courses of the semester in question; such leaves may be granted for up to one year. For additional information refer to USC policies governing continuous enrollment, readmission, and leaves of absence in the Academic Policies section of this catalogue.

**Time Limits**

All requirements for the Master of Planning must be completed within five calendar years from the beginning of the semester in which the student was admitted to the program. University regulations prohibit the acceptance of credits for courses taken toward the Master of Planning degree more than seven years after the date they were successfully completed.

**Grade Point Average Requirement**

While enrolled in the program a student must maintain a grade point average of at least 3.0 for all courses taken toward the degree.

**Probation and Disqualification**

Any student with a cumulative grade point average below 3.0 for all courses taken in the program will be placed on academic probation. A student whose semester grade point average is below 3.0, but whose cumulative grade point average is 3.0 or higher, will be placed on academic warning.

A student may be disqualified to continue toward a graduate degree if the student has been on academic probation for two consecutive semesters. Whether or not on academic probation or warning, a student may be
disqualified at any time from continuing in the program if the dean of the school, after consultation with the faculty, determines that the student is deficient in academic achievement or in another qualification required for the attainment of the Master of Planning degree.

Course Exemptions and Transfer of Credits

Graduate work by transfer may be accepted from approved graduate schools as determined by the USC Articulation Office upon recommendation of the dean of the school. Not more than 12 units of graduate work, with grades of B or better may be transferred for credit to the Master of Planning degree.

The following courses, or their equivalents, cannot normally be transferred for unit credit:

- PPD 526
- PPD 531
- PPD 532
- PPD 533
- PPD 535
- PPD 590

Undergraduate work will not be credited for advanced or graduate standing. Students may petition to receive subject credit for these courses; but unit requirements must be met through the completion of additional electives.

Some applicants for admission to the school have been engaged in work in planning, development or closely related activities. Although this experience may have been beneficial to the students involved and may satisfy the internship requirement, it may not be considered equivalent to academic education.

Master of Planning and Development Studies

The Master of Planning and Development Studies degree is designed for mid-career professionals in planning, development or related disciplines who desire to update and/or redirect their professional skills and careers. The program is very flexible, allowing students to pursue areas of expertise that they find valuable in their present or future careers. Entering students must have a minimum of five years of planning, development or related professional work experience.

Curriculum Requirements

The Master of Planning and Development Studies program requires completion of 28 units. Basic degree requirements consist of two core courses: 16 units in a concentration area approved by an adviser; and an integrative seminar course during which the student completes a written and oral comprehensive examination.

<table>
<thead>
<tr>
<th>Required Courses</th>
<th>Units</th>

</tr>
<tr>
<td>PPD 612 Research and Analytical</td>
<td>4</td>
</tr>
<tr>
<td>PPD 638 Integrative Seminar</td>
<td>4</td>
</tr>
</tbody>
</table>

Concentration Area(s)

Students select a concentration area from one of three already defined or, with prior approval by an adviser, design a concentration from Price School of Public Policy courses and USC graduate courses. A minimum of eight units must be Price School of Public Policy courses. The three defined concentration areas are:

- Community Economic Development Select 16 units from the following courses: PPD 618 (4), PPD 623 (4), PPD 624 (4), PPD 631 (2), PPD 633 (4).
- International Planning and Development Select 16 units from the following courses: PPD 613 (4), PPD 617 (4), PPD 619 (4), PPD 620 (4), PPD 621 (4), PPD 622 (4), PPD 631 (2), PPD 634 (4), PPD 712 (4).
- Environmental Policy and Planning Select 16 units from the following courses: PLUS 600 (4), PLUS 613 (4), PPD 531L (4), PPD 617 (4), PPD 619 (4), PPD 620 (4), PPD 621 (4), PPD 622 (4), PPD 631 (2), PPD 634 (4), PPD 712 (4).

International Planning and Development Seminar 16 units from the following courses: PLUS 613 (4), PLUS 631 (4), PLUS 633 (4), PLUS 640 (4), PPD 626 (4), RED 583 (2), RED 584 (4)

Integrative Seminar and Comprehensive Examination

Successful completion of a comprehensive examination is required of all students seeking the Master of Planning and Development Studies degree. The integrative seminar course (PPD 638) and comprehensive exam should be taken during the semester of intended graduation. During the seminar class, students identify a practice-oriented problem covering the core courses and concentration area, which ideally is sponsored by a planning and/or development office or firm. The student will: (1) prepare a professional-quality document; (2) present the solution to a faculty committee with invited sponsor guests; and (3) have an oral defense. Students who fail the examination may take it again within one year, but it may only be repeated once.

General Requirements

Residence and Course Load

The Master of Planning and Development Studies may be completed in one academic year of 12 units in the fall and spring semesters and the four-unit integrative seminar/comprehensive examination the following summer semester. At least 18 units of graduate study must be done in residence at the University Park Campus, the USC State Capital Center or at an approved off-campus study center.

Time Limit

Students in the program must complete all requirements for the Master of Planning and Development Studies within five calendar years from the beginning of the semester in which the student was admitted to the program.

Grade Point Average Requirement

While enrolled in the program, a student must maintain a grade point average of at least 3.0 (A - 4.0) for all courses taken toward the degree.

Probation and Disqualification

Any student with a cumulative grade point average below 3.0 for all courses taken in the program will be placed on academic probation. A student whose semester grade point average is below 3.0, but whose cumulative grade point average is 3.0 or higher, will be placed on probation.

A student may be disqualified to continue toward a graduate degree if the student has been on academic probation for two consecutive semesters. Whether or not on academic probation or warning, a student may be disqualified at any time from continuing in the program if the dean of the school, after consultation with the faculty, determines the student is deficient in any degree requirement.

Course Exemption and Transfer of Credits

Credit for graduate work may be transferred from approved graduate schools as determined by the USC Degree Progress Department in the Office of Academic Records and Register on recommendation of the dean of the school. Not more than four units of graduate work, with grades of B or better, can be transferred for credit toward the Master of Planning and Development Studies degree.

The following courses, or their equivalents, may not normally be transferred for unit credit from other institutions: PPD 611, PPD 612 and PPD 638. Undergraduate work may not be transferred into the degree program for unit credit.

Some applicants for admission to the school will have been engaged in work in planning, development or closely related activities. Although this experience should be beneficial to the students involved, it may not be considered equivalent to academic education.

Master of Public Administration

Admission

The Master of Public Administration programs are under the jurisdiction of the Price School of Public Policy. All admissions decisions are made by the school, following guidelines set by the university. See the Admission section of this catalogue.

All questions about the programs and all materials required for admission should be submitted to: MPA Programs, Admissions Office, RGL 111, University Park, University of Southern California, Los Angeles, CA 90089-0626.

Admission to each of these programs is determined by the faculty and admissions committees connected with those areas. Application packages should be sent directly to the program office.

Applications

The admission decision is made using criteria, which include verification that the applicant has completed a bachelor’s degree from an accredited college, has maintained a B average in undergraduate course work and has earned an acceptable score on the verbal and quantitative portions of the Graduate Record Examinations (GRE) or the Graduate Management Admissions Test (GMAT). Other elements of the applicant’s educational and experiential background are also evaluated. International students whose native language is not English must also submit a Test of English as a Foreign Language (TOEFL) or International English Language Testing System (IELTS) score.

Each candidate should submit the following to the school: (1) official transcripts of all previous college and university work, showing an awarded degree where appropriate; (2) copies of GRE or GMAT scores; (3) an essay answering questions on the admission questionnaire provided by the school; (4) an up-to-date resume which includes academic and professional accomplishments; (5) three or more letters of evaluation from previous instructors and from professional associates who can attest to the applicant’s potential; (6) completed USC Graduate Admission Application, along with the nonrefundable processing fee; and (7) completed Price School of Public Policy Supplemental Graduate Application.

International applicants may be asked to supply additional information. See the Graduate Admission section of this catalogue.

Deadlines

Applications for admission are evaluated monthly. Those students who are also applying for financial aid, or who must meet other deadlines for admission, should submit application materials early enough to allow the
admissions decision to be made in advance of those other deadlines.

The admissions process generally takes about four to six weeks after all necessary materials have been submitted.

Pre-Service/In-Service Designation

Most MPA students are classified as pre-service or in-service students at the time of admission. Pre-service students are those who enter the program with less than two years of professional work experience. In addition to course work, pre-service students complete an internship. Students pursuing the Intergovernmental Management specialization or one of the dual degree programs are not classified as pre-service or in-service. Appeals for reclassification of this designation must be submitted during the first semester of enrollment.

Prerequisites

Social Science

Any undergraduate major is acceptable as a preprofessional background, provided the applicant has had at least 12 semester units (16 quarter units) of undergraduate course work in cultural anthropology, economics, ethnic studies, social and human geography, political science, sociology or related social science area courses; no more than two of these courses may be in the same field.

Deficiencies in the social science prerequisite may be met while in residence by taking appropriate courses in other departments, but such course work may not be counted toward the course requirements for the master’s degree.

Statistics

A basic competence in descriptive and inferential statistics is also required for the MPA programs. This prerequisite may be met in one of two ways:

1. Entering students must have passed an undergraduate inferential statistics class, with a grade of “B” or better, at an approved university within three years of matriculation.

2. If students do not satisfy this prerequisite, they will be required to take PPD 502x Statistical Foundation for Public Management and Policy, a two-unit graduate level inferential statistics course. They must complete the course with a grade of “B” or better. The units associated with this class may not be used toward the MPA degree.

All prerequisites must be fulfilled within the first 12 units of graduate course work. The statistics prerequisite must also be met before enrolling in PPD 542, PPD 557, PPD 638 or PPD 666.

International Students

Students applying for graduate programs should send applications and appropriate documents to the MPA Programs Admissions Office, which processes all such applications.

Admission

A student is accepted for admission only for the semester indicated on the letter of admission. If the student desires to enter at another time, or if the student cannot arrive on campus in time for the semester in which he or she was admitted, the student must contact the MPA Programs Admissions Office in writing. That office will contact the Office of International Admissions.

Students who do not enroll for the semester indicated on the letter of admission cannot be guaranteed admission to a later session. They will need to work with the MPA Programs Admissions Office to determine procedures to follow.

Registration Requirements

International students on student visas must be registered as full-time students as arranged by the Office of International Services. Doctoral students must carry a load of at least 6 units to be considered full-time students. A full-time graduate load is 8 units. Such students are not eligible to be considered students without formal registration and may be in violation of immigration laws when not properly registered.

International students who have questions about registration requirements should contact the Office of Recruitment and Student Affairs.

Admission Status

MPA applicants may be permitted to take courses before the admission process is completed or they may be admitted before certain conditions have been met; each student must, however, attain regular status (standing) admission to the school prior to or upon completion of 8 graduate units.

Limited Status Students (Preadmission)

Students taking courses who have not been admitted to the school are designated limited status students. These students may be taking courses to meet prerequisites; they may be waiting for part of their application package materials to arrive; or they may be investigating whether an MPA is the best choice for them.

To be considered for limited status enrollment, interested students need to complete the Price School of Public Policy Limited Student Application for Enrollment form and submit official or unofficial copies of their transcripts from their bachelor’s degree granting institution. Students with a 3.0 grade point average (A = 4.0) may enroll in up to 8 units of graduate courses in the Price School of Public Policy.

Price School of Public Policy Limited Student Application for Enrollment forms may be obtained from the Admissions Office, Price School of Public Policy, University of Southern California, RGL 111, Los Angeles, CA 90089-0626; (213) 740-6842. Limited students may only enroll during the in-person registration period (the week before classes begin).

Limited status students may apply only 8 units of appropriate graduate work toward the MPA after admission. Units beyond these first 8 must be petitioned for through the school. Students on limited status are encouraged to complete the application and admission processes before completing those first 8 units.

Ph.D. Candidates

Ph.D. students who pass the qualifying examinations and complete the MPA course requirements or their equivalent during their course work at USC may, with the recommendation of the coordinator of the MPA program, apply for and receive the MPA degree.

MPA Curriculum

The MPA course requirements are designed to address current and future professional competencies for accomplishment; to establish a sequence of basic required courses; and to maximize student choice and depth in specialized studies. The curriculum requires 40 units for completion (41 for pre-service students). Pre-service students, that is, those who have less than 25 months’ employment experience in a professional level position, are also required to take an internship that includes a one-unit seminar.

<table>
<thead>
<tr>
<th>Core Courses</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPD 500 Intersectoral Leadership</td>
<td>2</td>
</tr>
<tr>
<td>PPD 501ab Economics for Policy, Planning and Development</td>
<td>2-2</td>
</tr>
<tr>
<td>PPD 540 Public Administration and Society</td>
<td>4</td>
</tr>
<tr>
<td>PPD 546 Capstone in Public Administration</td>
<td>4</td>
</tr>
</tbody>
</table>

Three of the required core courses (PPD 500, PPD 501ab and PPD 540) provide the foundation to the field and the fourth (PPD 546) serves as a capstone course. PPD 540 must be taken in the first semester or within the first 12 units and PPD 546 must be taken in the final semester or last 12 units of the student’s program.

Management Competencies

MPA students are expected to develop managerial competencies in three areas by taking at least one course in each of the following areas:

<table>
<thead>
<tr>
<th>Management Competencies</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>Analytic Methods</td>
<td></td>
</tr>
<tr>
<td>PPD 542* Policy and Program Evaluation, or</td>

</tr>
<tr>
<td>PPD 666* Administrative Research and Analysis</td>
<td>4</td>
</tr>
</tbody>
</table>

Organizational Behavior

PPD 545 Human Behavior in Public Organizations | 4

*(With the approval of the MPA or center director, the student may choose a human resource management elective to fulfill this requirement.)

Finance

<table>
<thead>
<tr>
<th>Finance</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPD 541 Public Financial Management and Budgeting, or</td>
<td></td>
</tr>
<tr>
<td>PPD 645 Financial Management of Nonprofit Organizations</td>
<td>4</td>
</tr>
</tbody>
</table>

*(With the approval of the MPA or center director, the student may choose a financial management elective to fulfill this requirement.)

Area Cluster Electives

Students may elect to devote their elective courses (14 units) to gain depth in a designated area cluster. These areas include the following: community and economic development, environmental management and land-use policy, financial management, health administration, human resources management, information technology management, intergovernmental management, international policy and management, local government, nonprofit management, planning, public policy, real estate development, transportation, and urban form and design.

Students may elect to follow a more generalist perspective and take their elective courses from the array of elective offerings.
Thesis Option

Thesis option, PPD 594ab Master’s Thesis (4 units), may be taken as part of the elective category. Information regarding the thesis contract is available from the MPA director. All theses and dissertations submitted in fulfillment of requirements for graduate degrees must conform to university regulations with regard to form and method of preparation.

Internships

Pre-service students — that is, those with fewer than 24 months’ employment in a professional level position — are required to complete at least 300 hours of an internship and an internship seminar (PPD 543). MPA students may enroll in the internship seminar during their first semester. Students complete internships in conjunction with the internship seminar.

Specialization in Intergovernmental Management

In addition to the substantive area cluster, MPA students may choose the specialization in intergovernmental management.

Students enroll in courses and serve in internships in at least two levels of governance. A student may take courses toward this specialization at either the Los Angeles or USC State Capital Center. Internships may be taken through either of these centers. Students electing this specialization meet with the intergovernmental management coordinator at either the Los Angeles or the USC State Capital Center to design their program.

To complete this specialization, students complete three courses from the following lists (with at least two drawn from the first list): (1) PPD 661, PPD 662, PPD 663, PPD 669, PPD 670; (2) PPD 688, PPD 689, PPD 690.

Master of Public Policy

The Master of Public Policy (MPP) program is designed to prepare students for careers as professional policy analysts. Through an interdisciplinary curriculum and real world experience, students gain an understanding of the policy process, and develop the capacity to formulate, analyze and implement public policy.

The MPP degree is offered at the University Park Campus only.

Requirements for Admission

Candidates for admission must have maintained a minimum B (3.0) average during their undergraduate degree work and attain a score of at least 500 on the verbal and at least 500 on the quantitative sections of the GRE. Exceptions to these requirements are allowed if justified by outstanding work experience, letters of recommendation, or demonstrated improvement in academic performance during undergraduate studies.

Applicants must have a bachelor’s degree from an accredited institution and have a basic competence in descriptive and inferential statistics. This prerequisite may be met in one of two ways: (1) entering students must have passed an undergraduate inferential statistics class, with a grade of “B” or better, at an approved university within three years of matriculation, and must pass the MPP lab associated with PPD 554 Foundations of Policy Analysis, or (2) take PPD 502X Statistical Foundations for Public Management and Policy and complete with a grade of “B” or better, if students select to take PPD 502X, the units associated with this class may not be used toward the MPP degree.

Degree Requirements

Students are required to complete 48 units of graduate work, with 24 units of core and 24 elective units divided between management, analytic and specialization areas.

</tbody>
</table>

*During a student’s final semester of the program, the Policy Analysis Practicum is required as a component of the program’s 48 units of course work. The practicum is an opportunity for students to apply their analytic skills to a current problem for an actual client. Admission to the practicum is granted on the approval of the MPP director, and normally requires prior completion of most required courses.

Electives

Students complete 4 units of management elective, 8 units of analytic elective and 12 units of specialization elective. These electives typically are selected to support specialization in a substantive policy area (e.g., environment or community economic development).

Management Elective (Choose 4 units) Units

</tr>
</tbody>
</table>

*Students who select PPDE 660 to meet their analytic requirement will add the remaining 2 units to the 12 specialization units in consultation with their academic advisor.

In addition, students take 12-14 units of additional electives selected by the students with the advice of the academic adviser or director of the MPP program. These electives are typically are taken in an area of policy specialization, such as: community economic development, education policy, environmental policy, health, infrastructure, international policy and development, media and communications, philanthropy and nonprofit, and transportation.

Students may not take more than 12 units outside of the Price School of Public Policy without written consent of the director of the MPP program.

Master of International Public Policy and Management

The International Public Policy and Management (IPPM) program is designed for managers, planners and analysts involved in social sector programs who want to strengthen their management skills and further develop their policy analysis capabilities. For professionals working in the social sectors, IPPM offers an opportunity to deepen their conceptual understanding of the forces driving change in their sectors and to develop an analytical approach for accessing and reshaping social policy. The program is well-suited for mid-career professionals working in the social sectors, such as physicians, nurses and pharmacists in the health professions; educators and administrators in the teaching professions; government regulators, managers and staff; community organizers, aid workers and others working in the NGO sector; and reporters and others in the news professions interested in covering social issues.

This program is specifically designed for international students and U.S. students who wish to work in international settings, including the Pacific Rim, Latin America and countries in other regions with evolving social systems.

Students are required to complete a minimum of 32 units. All students must fulfill core requirements (18 units) in fundamental policy analysis and management disciplines and an additional 14 units in an area of concentration chosen by the student. The core requirements include: PPD 501A Economics for Policy Planning and Development; PPD 542 Policy and Program Evaluation; PPD 569 Applied International Policy Analysis and Management Project; PPD 570 Applied Statistics for Planning, Policy and Management; and PPD 571 International Public Policy and Management Seminar.

Students select an area of concentration in which they complete a set of recommended elective courses. Each concentration allows students to pursue in depth one or more areas of particular relevance to their career goals. The concentration areas enable students in the interdisciplinary IPPAM program to establish a second “home” in one of the school’s programs, such as health administration or urban planning. Students are required to consult with IPPAM faculty advisers to choose elective courses from a recommended list of courses relevant to the IPPM degree.

Through the integrated curriculum, participants gain practical skills, which are developed within an appropriate conceptual context. Many of the courses and applied projects integrate examples and data from the student’s home countries. Program graduates will have achieved advanced competency in disciplines that include public sector economics, applied methods for public policy analysis, evaluation and management.

Core faculty are drawn from the Price School of Public Policy and include senior, experienced faculty along with leading practitioners and experts in applied fields such as community development, international policy and development, health care policy, and so forth. In addition to the participation of distinguished visiting scholars as guest
lecturers in class sessions, the program features an international seminar on public policy and management with guest lectures by policy makers. The opportunity to interact with leading scholars, policy makers, and practitioners from the United States and abroad is an essential component of the program.

The program begins in mid-June with intensive English language workshops and the course in applied statistics. The language workshop can be waived for students with 250+ computer-based TOEFL scores or 600+ paper-based TOEFL scores, or a score of 6.5 on the IELTS exam with no less than a score of 6 on each band score. In the fall semester, international students transition into the regular program consisting of required courses and electives in their chosen concentration area. Some international students may be required to enroll in additional English language workshops depending on how they score on required English exams. Most students can expect to complete the program in 13 months. The intensive nature of the program is designed for full-time students who take a leave from work while enrolled in the program. This approach minimizes the amount of time that professionals must be away from their full-time careers to pursue an advanced degree.

Applicants should have at least a bachelor’s degree from an accredited university and three to seven years of significant professional experience. The IPPAM Program office is located in the Price School of Public Policy, Von KleinSmid Center, Room 253, phone (213) 740-0547, fax (213) 821-1331, email:ippam@usc.edu.

USC Dollinger Master of Real Estate Development

The Master of Real Estate Development program is a carefully integrated program that brings together the three main elements of real estate development: design, finance and policy. It is a one-year full-time or two-year evening executive program of study designed to provide students with the knowledge and skills they require to compete successfully in the development industry. The curriculum encompasses eight areas of study with which developers must be conversant, including real estate law, economics, finance, market analysis, negotiation, planning, architecture and engineering. Courses are taught by full-time faculty members from the Price School of Public Policy. In addition, practicing developers, lawyers, planners and other professionals make regular contributions to the course of study, helping students link learning to practice.

Curriculum Requirements

The program of graduate study for the professional degree requires successful completion of the core curriculum (34 units), elective courses (8 units) and a comprehensive examination. Students must complete a total of 44 units.

Core Curriculum

The core comprises 13 lecture-seminar courses that combine lectures, projects, case analyses, and exercises which allow students to experience all facets of the developer’s tasks and problems. The integrative project, RED 575L, provides problem solving exercises and the evaluation of actual development situations. Courses emphasize various design, regulatory and fiscal problems associated with urban development and the developer’s role in improving development standards in the industry.

Red 509 Market Analysis for Real Estate 4
Red 542 Finance of Real Estate Development 3
Red 544 Real Estate Capital Markets 2
Red 546 Applications of Real Estate Finance to Problems of Development 3
Red 547 Project Management and Construction 2
Red 551 The Approval Process 4
Red 562 Legal Issues in Real Estate Development 4
Red 573 Design History and Criticism 2
Red 574 Building Typologies 2
Red 575L Community Design and Site Planning 4
Red 598 Real Estate Product Development 2

Eight units of elective course work are required for the Master of Real Estate Development. These courses may be taken in the schools of Public Policy, Architecture, Business, Law and the Department of Civil Engineering. Admission to some classes requires advanced prerequisites and is subject to availability and approval of the instructor.

Comprehensive Examination

Successful completion of a comprehensive written and oral examination is required of all students seeking the Master of Real Estate Development degree. The examination explicitly covers the core courses. It is normally administered late in the spring semester by a faculty committee appointed by the dean. Students who fail the examination once may take it again within one year. The examination may not be repeated more than once.

General Requirements

Residence and Course Load

The Master of Real Estate Development may be completed on either a full-time or part-time basis. Both options begin in the summer session in June. The full-time program requires 11 months of study. The evening executive option is completed over a two-year period. Students are also expected to participate fully in all extracurricular activities associated with the Master of Real Estate Development program, including the weekly speaker series.

Students who wish to take a leave of absence for a semester or longer must request it from the dean in writing; such leaves may be granted for up to one year. Students must have an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills.

Time Limit

The time limit within which students in the program must complete the requirements for the Master of Real Estate Development is governed by the following regulations:

All requirements for the Master of Real Estate Development must be completed within five calendar years from the first course at USC applied toward the degree.

University regulations prohibit the acceptance of credits for courses taken toward a Master of Real Estate Development degree more than seven years after the date they were successfully completed.

Grade Point Average Requirement

While enrolled in the program, a student must maintain a grade point average of at least 3.0 for all courses taken toward the degree.

Probation and Disqualification

Any student with a cumulative grade point average of below 3.0 for all courses taken in the program will be placed on academic probation. A student may be disqualified to continue toward a graduate degree if the student has been on academic probation for two consecutive semesters. Should a student not on academic probation or warning, a student may be disqualified at any time from continuing in the program if the dean of the school, after consultation with the faculty, determines that the student is deficient in academic achievement or in another qualification required for the attainment of the Master of Real Estate Development degree.

Course Exemptions and Transfer of Credits

Courses taken toward other degree programs, if determined by the dean to be equivalent to courses in the curriculum, may be accepted for subject credit only. All students are required to complete 44 units while enrolled in the Master of Real Estate Development program. The acceptance of previous course work for subject credit will enable the student to take additional elective courses.

Graduate Professional Labs

USC’s Price School of Public Policy offers professional consulting-like experience for graduate students in its core master’s degree programs. Participants are presented with a challenging professional assignment and a well-defined client and terms of reference. Students typically work in teams to produce a professional report and related materials that present the client at the close of the assignment. The terms of reference for the lab vary each year depending upon the client, the instructor and the setting, among other considerations.

In principle, these professional labs may be held anywhere, either in Los Angeles, elsewhere in the United States or abroad.

The Price School professional laboratory teaches students to integrate scholarly knowledge with professional practice. Likewise, it helps participants make the transition from the classroom back to a &rdquo;real world&rdquo; setting. In the case of international labs, participants also gain a deeper and more direct understanding of how the culture of professional practice can vary from one setting to the next. Through the Price School professional laboratory students build their credentials and experience while also extending their network of professional contacts.

These professional labs are intended primarily for graduate students in public administration, planning, real estate development, public policy and health administration. A distinctive feature of the professional laboratory is that it is intended as an integrative professional experience across the school, so that students from any of these programs may participate fully.

Each summer the Price School offers one or more international labs/workshops. Recent international labs have been held in China, Brazil, Germany, Morocco, Italy and Vietnam. All students are encouraged to take at least one international lab course.
Exchange Program

The Hertie School of Governance exchange program is a one-semester exchange program offered during the fall semester. The program will provide opportunities for students to acquire knowledge and skills necessary to become global leaders and succeed in a global market. All instruction is in English; proficiency in a foreign language is not required. Courses completed at the Hertie School of Governance are graded credit/no credit on the student’s USC transcript. The courses are selected from a list approved by the Price School of Public Policy. Students must work with their program administrator to understand how the courses will return to their degree.

Graduate Certificate Programs

Certificate in Transportation Systems

The graduate certificate in Transportation Systems is an interdisciplinary program administered by the Department of Civil Engineering. The certificate program allows students to specialize in transportation applications, while simultaneously receiving a degree in their home department. The certificate in transportation systems combines elements of transportation engineering with transportation policy, planning and project management. The program is especially appropriate for students intending to pursue careers as developers of transportation technologies or as implementers of technologies within government agencies.

Students electing the certificate program apply to the Department of Civil Engineering.

Course prerequisites for the program are:

1) one course in statistics or uncertainty, equivalent to CE 408, ISE 255 or PPD 4044;
2) one course in engineering economy, equivalent to ISE 460;
3) one course in microeconomics, equivalent to ECON 203; and
4) one course in a high level programming language, such as C or Fortran.

These prerequisites may be satisfied after enrollment in the certificate program by taking the indicated courses or their equivalent. Graduate students cannot receive credit for courses numbered below 400. Detailed admissions requirements are published by the Department of Civil Engineering.

Requirements for Completion

The curriculum consists of five graduate courses for a total of 15 units.

Up to 10 units of the certificate may be applied toward both the certificate and to the core requirements or electives in the Master of Public Administration. Up to 12 units may be applied toward both the certificate and toward core or electives in the Master of Public Policy or Master of Planning.

The director of the graduate programs in public policy and management will provide advisement.

Certificate Programs in Public Financial Management

Students enrolled in the Public Financial Management certificate program are required to take 52 graduate units of course work (33 for pre-service students). Fourteen of these units are MPA core courses (PPD 500, PPD 508, PPD 540 and PPD 546); and 12 units of management competencies (PPD 541, PPD 542 or PPD 557 or PPD 666, and PPD 545). In addition, students must take 16 units of course work in finance and related subjects (PPD 516, PPD 554 or PPD 555, PPD 647 and PPD 661 or PPD 662 or PPD 669). Ten units of approved electives will be selected from among: PPD 510, PPD 542, PPD 652, PPD 660, PPD 661, PPD 662, PPD 669, PPD 679 and PPD 688. Pre-service students must also serve an internship and be enrolled in PPD 543.

Students may receive this certificate with a specialization in intergovernmental management provided they complete the three course sequence (PPD 661, PPD 662, PPD 669). Students may satisfy this requirement if they apply two of these courses toward the 10-unit elective requirement and apply the third course toward the 16-unit finance and related subjects requirement.

*Students who select PPD 554 (rather than PPD 555) must select an additional 2-unit elective.

Certificate Programs in Health Management and Policy Programs

The Health Management and Policy Programs of the Price School of Public Policy offers certificate programs in specialized areas of health care administration. The certificates are designed to provide practitioners with means for improving or updating their knowledge and experience in a challenging and professionally relevant course of study. Certificates are offered in Administration of Long Term Care Programs and Management of Ambulatory Care Systems. Applicants for the certificate programs must make formal application for admission to the certificate program, provide transcripts of all college work, supplemented by three letters of recommendation, including one from a former instructor, a resume and a personal statement describing their career goals and the relationship of the certificate to those ends.
It is expected that applicants to the certificate programs should have graduated from a recognized college with an approximate grade point average of 3.0 in the last 60 units of college work. Non-graduates may be admitted if the director believes that there is evidence to suggest that the applicant is capable of graduate level work.

Successful completion of the certificate will not be a deciding factor in the admission decision for the degrees offered by the Health Management and Policy Programs or the Price School of Public Policy.

The Ambulatory Care program requires 20 units of graduate credit including a 16-unit core and a four-unit specialization in an area of the certificate concentration. Core courses (16 units) are: PPD 505; PPD 510a or PPD 516; PPD 545 or PPD 557; one elective. One specialized seminar as follows (four units): PPD 660, PPD 661 or PPD 663. The program can be completed via distance learning.

Completing a certificate program does not constitute completion of or admission to the Master of Health Administration (MHA) or Executive Master of Health Administration (EMHA) degree programs nor will it be a deciding factor in the admission decision to those programs. Students in the MHA program, however, may qualify for award of these certificates if they complete the applicable course requirements.

Certificate in Public Management
This program provides students with a solid foundation of training and skills in management. Individuals who need training in public administration but who are unable to enroll for the Master of Public Administration (MPA) degree may find this certificate program of particular interest. Key to the program’s success is the close integration of the academic curriculum and the application of skills and theory to managerial work assignments. Students may enroll at any time throughout the year.

The program consists of four courses: PPD 540, PPD 542, PPD 545, and one elective selected from any 500-level offering in the Price curriculum.

Certificate in Public Policy
This graduate certificate program provides students with a foundation in public policy analysis. It is designed to provide expertise in public policy to individuals working in the field with an interest in refining their risk and security analysis skills as well as others with interest in the field. The certificate develops risk analysis skills and provides students with the knowledge needed to understand the issues surrounding the increasingly important issues of homeland security and public policy.

Applicants for the Certificate in Homeland Security and Public Policy who are currently enrolled in a graduate program at USC in good standing with a 3.0 GPA only need to submit the appropriate paperwork for adding the certificate program which may be obtained from the student services adviser.

Applicants for the Certificate in Homeland Security and Public Policy who have not matriculated at USC must make a formal application for admission to the certificate program, provide transcripts of all college work, a resume and one letter of recommendation.

The certificate in homeland security and public policy consists of 15-16 units of graduate course work depending on the course selected.

Certificate in Sustainable Policy and Planning
This graduate certificate program provides students with a foundation in policy and planning issues in sustainability and the environment. The certificate develops analytic and methodological skills and provides students the knowledge to understand the increasing importance of issues surrounding the environment and sustainability in policy and planning.

For admissions information, please visit the Price Website. The Master of Planning director will provide advisement.

The Certificate in Sustainable Policy and Planning consists of 12-14 units of graduate course work:

<table>

Certificate in Health Systems Operations
This 17-unit graduate certificate is jointly sponsored by the Epstein Industrial and Systems Engineering Department and the Price School of Public Policy (Master of Health Administration program) and, administered by the Epstein Industrial and Systems Engineering Department. See the Industrial and Systems Engineering Department for course requirements.

Certificate in Real Estate Development
This graduate certificate program provides students with a foundation of the key elements of real estate development. It is designed to provide these foundations for non-Master of Real Estate Development students who wish to obtain this knowledge to complement their graduate program of study as well as their careers. For admissions information, visit the Price School Website.

The certificate in real estate development consists of 12 units of graduate course work: RED 510, RED 511 and RED 512.

Certificate in International Policy and Planning
The Graduate Certificate in International Policy and Planning strengthens students’ understanding of global policy, planning and public management issues underscoring comparative differences in policy approaches and governance institutions across countries, builds a core foundation of knowledge about the governing institutions and agreements that operate on a global level, and prepares students for working in international organizations. The professions of graduate students in the Price School (public administration, public policy, urban planning, health policy and management, and real estate development) are globalizing. To analyze and understand the impact of globalization on their chosen field and to be competitive in a global context, emerging leaders in these professions should be conversant in thinking and operating on a global scale. Earning this certificate better prepares students for the professional demands of the globalized era.

The Certificate in International Policy and Planning consists of 14 units of graduate course work.
Dual Degree Programs

A dual degree program is an academic option that allows a student to enroll in two graduate programs simultaneously. Application must be made to both schools, and if accepted to both, the student pursues a specially designed program which combines selected courses from the two academic units. Students are required to seek advisement from both schools. The student will have the opportunity to acquire the knowledge and skills from two fields of study.

The dual degree program enables the student to integrate a closely related field with planning or development. The purpose of the dual program is to provide an enriched educational experience; accordingly, concurrent course work in the two fields is required.

Since the unit requirements of dual degrees depend upon the mutual transfer of units between the two academic units, no other transfer of credits will be allowed.

Students who decide, at any point, to earn only one of the two degrees must meet all the regular requirements for earning that degree alone.

Students in Master of Planning dual degree programs must fulfill the comprehensive examination and appropriate internship requirements except where noted otherwise.

Master of Heritage Conservation/Master of Planning

The Master of Heritage Conservation/Master of Planning dual degree program facilitates highly related cross-disciplinary studies in heritage conservation and in urban planning at the master’s level. The primary objective of the dual degree curriculum is to impart to students a basic familiarity with the origins and development of the philosophies, theories, and practices of planning and heritage conservation. This curriculum has been developed so that students will graduate from this program with a broad practical knowledge of the laws, regulations, and policies that apply to planning and conservation practice in the United States and internationally. This expertise will include knowledge of urban design, public policy, and architectural and planning history and theory. Students will be expected to understand the critical methodological tools necessary for a professional engaged in the investigation, interpretation, and evaluation of the urban built environment.

Qualified students who are admitted to the graduate programs in both the School of Architecture and the USC Price School of Public Policy may complete both degrees in a highly integrated five-semester program.

Requirements

Requirements for completion of the dual degree program are 60 units, including 30 units in heritage conservation and 30 units in planning, as follows:

Total 30

**Electives**

Students select at least 6 units of elective courses. The elective courses may be taken from within the Price School of Public Policy course offerings or other USC units. The electives will be selected from three topic areas: international development; urbanization, policy issues and sustainability; and global health. The electives will be selected in consultation with and approved by the faculty advisor for the certificate program. The electives should be chosen so that the combination of core classes and electives produces a well-rounded and rigorous preparation for professional practice in a globalized context.

Admission Requirements and Application Procedures

Applicants for the Certificate in International Policy and Planning who are currently enrolled in a graduate program at USC and are in good standing with a 3.0 GPA only need to submit the appropriate paperwork for adding the certificate program, which may be obtained from the program administrator.

Applicants for the Certificate in International Policy and Planning who have not matriculated at USC must make a formal application for admission to the certificate program; provide transcripts of all college work, a resume and one letter of recommendation.

Please contact the USC Price Office of Admissions at uscprice@usc.edu for more information.

Non-Credit Programs Offered by the Center for International Training and Development

Management Effectiveness Program

This is a four-week intensive training program in the art and science of management. The program is designed to enhance leadership effectiveness and the development of a management generalist perspective.

International Executive Development Laboratory

This five-week laboratory focuses on issues in executive leadership, strategic management, environmental analysis, international finance and economics, computer-based project planning, and implementation of planned change strategies.

Heritage Conservation

**Architectural Conservation**

- ARCH 549: Fundamentals of Heritage Conservation (3 units)
- ARCH 550: Heritage Conservation Policy and Planning (3 units)
- ARCH 551: Conservation Methods and Materials (3 units)
- ARCH 552: Introduction to Historic Site Documentation (2 units)
- ARCH 553: History of American Architecture and Urbanism (3 units)
- ARCH 555: Global Perspectives in Heritage Conservation (2 units)
- ARCH 612ab: Heritage Conservation Thesis Preparation and Thesis (2-6 units)

**HISTORIC PROPERTIES**

and 36 units in planning. See the School of Architecture for course requirements.

Master of Planning/Master of Business Administration

The Master of Planning/Master of Business Administration dual degree program enables the student to understand the conduct and requirements of business, accounting, corporate and strategic planning, real estate marketing, and finance. Further, students gain expertise in public policy, city planning and the interpretation of government regulations. Exposure to both fields becomes an educational as well as a professional asset for careers in either public service or private enterprise. This dual degree program normally requires five semesters in residence.

Requirements

A total of 84 units is required for the dual degree: 48 units of work in the USC Marshall School of Business and 36 units in the Price School of Public Policy. Required courses that must be taken in the Marshall School of Business include: all required courses in an MBA program and graduate business elective sufficient to bring the total units completed in the Marshall School of Business to at least 48. Dual degree students must not count courses taken outside the Marshall School of Business toward the 48 units.

Master of Planning/Master of Arts in Economics

The Department of Economics jointly offers a two-year program leading to the MPl and M.A. degrees. Applicants must complete a thesis. Students must register in a minimum of 4 units of ECON 594 in (2, 2, 0) and maintain continuous registration until completion of the thesis.

Internship: A dual degree student in this program must fulfill the internship requirement.

During the summer after the first year of graduate study, the student normally serves an internship in a planning organization. The student must complete a thesis acceptable to both faculties.

Thesis: A thesis is required on a subject interrelating economics and urban planning and development. Students must register in a minimum of 4 units of ECON 594abz (2, 2, 0) and maintain continuous registration until completion of the thesis.

Internship: A dual degree student in this program must fulfill the internship requirement.

During the summer after the first year of graduate study, the student normally serves an internship in a planning organization. The student must complete a thesis acceptable to both faculties.

Master of Planning/Master of Science in Gerontology

The Master of Science in Gerontology (M.S.) dual degree is one of a few in the nation which combines the knowledge of the older population with the skills needed to plan services for older people. The M.S. prepares the graduate for the responsibilities involved in development of public and private institutions and programs. The M.S. indicates a special focus on the older person and the skills to analyze and design programs for this growing population. The M.S. is offered through the USC Davis School of Gerontology.

Requirements

Requirements for completion of the dual degree program are 66 units including 26 units in gerontology, 36 units in planning and a minimum of 4 units of thesis in either gerontology or planning, as follows:

GERONTOLOGY

<table>

</tbody>
</table>

Electives: 4 units of elective courses taken within the Price School of Public Policy.

Thesis: A thesis is required on a subject interrelating gerontology and planning. Students must register in a minimum of 4 units of PPD 531L (4, 4) or ECON 594abz
(2,2,2). Students must maintain continuous registration until completion of the thesis.

Program Adaptation: The USC Davis School of Gerontology waives GERD 259 Case Studies in Leadership and Change Management because students enrolled in this program will have a primary professional focus in planning.

Master of Planning/Master of Landscape Architecture

The dual degree option in planning and landscape architecture (in the USC School of Architecture) trains professionals in policy and design, and to be competent with design problems at different scales, but with a distinctly urban focus. Candidates must be independently admitted to the Master of Planning and Master of Landscape Architecture programs. The dual degree program normally requires between five and seven semesters in residence.

Requirements

Completion of the dual degree requires 24 units of courses in urban planning, 10 units of thesis option I or II and either 32 units of landscape architecture (for those students admitted with advanced standing); 48 units of landscape architecture (for those students admitted with advanced placement); or 74 units of landscape architecture (for those students admitted to the three-year curriculum). See School of Architecture for course requirements.

Master of Planning/Master of Public Administration

The Master of Planning/Master of Public Administration dual degree program is designed for the study of the relationships between planning and public administration. Administrative skills, budgeting and fiscal analysis, a knowledge of operations services of local governments, and formulation and conduct of planning operations within the context of municipal management are required. This dual degree program normally requires five semesters in residence.

Requirements

Requirements for completion of the dual degree program are 60 units, including 26 units in public administration, 20 units in planning and 14 units of electives (8 in planning), as follows:

Required Prerequisites: 12 undergraduate course credit units of social science, not more than 8 units in any one field, are required. Students must also satisfy the MPA statistics prerequisite and other prerequisites. PPD 525 satisfies the Price School of Public Policy prerequisite in descriptive and inferential statistics for students in the Master of Planning/Master of Public Administration dual degree program. Dual degree students completing PPD 525 with a grade of B or higher need not take PPD 526 instead, they choose to take 2 additional elective units for a total of 16.

Dual degree students, like other MPl students, must take a comprehensive examination and fulfill the internship requirement.

Master of Planning/Master of Public Health

The Master of Planning/Master of Public Health (MPl/MPH) dual degree is designed for individuals who envision a career that combines urban planning and public health disciplines. This dual degree combines the knowledge of urban planning with an understanding of health from a population perspective. It will provide training for planning, evaluating and guiding healthy community and urban development, and will enable graduates who seek to be agents of change within the profession to assume leadership roles in planning and in public health at the local, state and national levels. A total of 79 units are required for the dual degree.

Requirements

Requirements for completion of the dual degree program are 60 units, including 26 units in public administration, 20 units in planning and 14 units of electives (8 in planning), as follows:

Required Prerequisites: 12 undergraduate course credit units of social science, not more than 8 units in any one field, are required. Students must also satisfy the MPA statistics prerequisite and other prerequisites. PPD 525 satisfies the Price School of Public Policy prerequisite in descriptive and inferential statistics for students in the Master of Planning/Master of Public Administration dual degree program. Dual degree students completing PPD 525 with a grade of B or higher need not take PPD 526 instead, they choose to take 2 additional elective units for a total of 16.

Dual degree students, like other MPl students, must take a comprehensive examination and fulfill the internship requirement.

Master of Planning/Master of Arts, Art and Curatorial Practices in the Public Sphere

The Master of Planning/Master of Arts, Art and Curatorial Practices in the Public Sphere dual degree program offers an unusually rich opportunity for students interested in developing a new knowledge base to become
successful professionals working in the arena of organizing art projects in urban public space, planning and community development. Los Angeles and the facilities at USC provide a unique learning laboratory to educate a more competitive professional with a better understanding of both the administration of public art and issues of urban planning.

Students must complete the following requirements in this program: 70 units, including 28 units in the Master of Arts, Art and Curatorial Practices in the Public Sphere program, 22 in policy, planning, and development, and 20 in a field of study with no more than 8 units taken from other USC programs.

Note: 2-unit courses may be offered in seven-and-a-half week blocks.

*PPD 627 is the methodology course for the Preservation and Design of the Built Environment concentration. Students who choose to do a concentration other than Preservation and Design of the Built Environment need to take the respective methodology course.

Dual degree students, like all MPI students, must take a comprehensive examination and fulfill the internship requirement.

**Field of Study (20 units)**

Students may include no more than 8 units from outside the Roski School of Art and Design and the Price School of Public Policy. The MPI program requires students to declare their concentration during the fall semester prior to taking the comprehensive examination in the spring semester. Students are required to complete the gateway course and methodology course related to their concentration as part of their preparation for their comprehensive examination. The student’s concentration must contain a 4-unit methodology course, a 4-unit gateway course and 8 other units directly concerned with the subject matter of the concentration.

**Capstone Projects**

Projects must complete a master’s thesis or final project through the Roski School of Art and Design and the MPI comprehensive examination through the Price School of Public Policy.

**Internship**

All students must complete 400 hours of internship through the Price School of Public Policy. This internship may be partially or completely fulfilled through prior professional experience.

**Master of Public Policy/Master of Planning**

The Master of Public Policy/Master of Planning dual degree program gives students the opportunity to develop a depth of analytic and design skills with which to effectively address the problems of urban communities. The dual degree program normally requires six semesters in residence.

### Requirements

Completion of the dual degree requires 72 units, including: PPD 500 and PPD 501a, 32 units in public policy, 22 units in planning, 6-8 units in electives and 8 units in planning studios/practicum.

**Prerequisites**

Applicants must have a basic competence in descriptive and inferential statistics. This prerequisite may be met in one of two ways: (1) entering students must have passed an undergraduate inferential statistics class, with a grade of “B” or better, at an approved university within three years of matriculation, and must pass the MPP lab associated with PPD 534 Foundations of Policy Analysis, or (2) take PPD 502x Statistical Foundations for Public Management and Policy and complete with a grade of “B” or better. If students select to take PPD 502x, the units associated with this class may not be used for graduate credit.

</tr>
</tbody>
</table>

*Note: 2-unit courses may be offered in seven-and-a-half week blocks.

**Electives**

Students are required to take 6-8* units of electives from the curriculum offered by the university. Non-Price School courses may be selected by the students with the approval of an academic adviser.

**Practicum/Planning Studies**

After finishing the core courses of both programs, students are required to take 8 units in practicum/planning studios: 4 units from the public policy program (PPD 561-ab) and a units from the planning program (PPD 531).

**Comprehensive Exam and Internship**

Dual degree students, like all MPI students, must take a comprehensive examination and fulfill the internship requirement.

**Master of Planning/Master of Social Work**

The dual degree program between the USC School of Social Work and the USC Price School of Public Policy offers unique opportunities for students who want to devote their professional careers to social policy, social planning or social services delivery. Students with a dual degree will have broader employment options beyond those in traditional planning or social work.

The schedule of courses allows students to experience direct service in the first year so that course work planning is supplemented by a knowledge of consumers, service delivery, etc. Courses for both schools are taken simultaneously, intermingling social work and planning content. Two years of field practicums in social work provide in-depth exposure to social service issues from both planning and direct service perspectives, thus satisfying some of the planning laboratory/workshop requirements and eliminating the need for a separate planning internship requirement.

### Requirements

Requirements for completion of the MSW/MP degree are 83 units including 51 units in social work and 32 units in planning. Students must select a community organization, planning and administration concentration in the second year of their social work program.

### Electives

Courses are required to take 6-8* units of electives from the curriculum offered by the university. Non-Price School courses may be selected by the students with the approval of an academic adviser.

*All students must complete 400 hours of internship through the Price School of Public Policy. This internship may be partially or completely fulfilled through prior professional experience.
The Price School of Law and the USC Price School of Public Policy offer a dual degree program that enables qualified students to earn both a Juris Doctor and a Master of Public Policy (MPP). This program is designed for students interested in law and public policy. Students are required to complete 114 units of course work, 78 units in the law school and 36 units in the Price School of Public Policy. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs. In addition, the MPP program has a statistics prerequisite. Please see the MPP degree in the Price School of Public Policy section of the catalogue for the requirements.

The required MPP courses are PPD 500, PPD 501ab, PPD 554, PPD 555, PPD 556, PPD 560, PPD 560ab; 6 units of a management elective (PPD 541, PPD 545, PPD 654, PPD 656, PPD 662, PPD 672, PPD 675, PPD 690 or PPDE 645); and 8 units of an analytic elective (COMM 650, PM 542, PPD 542, PPD 557, PPD 577, PPD 617, PPD 647, PPD 661, SOCI 621 or SSCI 591).

### Master of Real Estate Development/Juris Doctor

The Juris Doctor/Master of Real Estate Development dual degree program provides the opportunity for in-depth study of legal issues and real estate development. The increasingly regulatory environment developers work within demands that professionals in the real estate industry have a strong understanding of the legal system. Lawyers who plan to specialize in real estate law will benefit from a thorough understanding of the development process, including financial, planning, marketing and design issues. Application must be made to both the USC Gould School of Law and the USC Price School of Public Policy. This program normally requires three years (including one summer) of full-time study in residence to complete.

Requirements for completion of the dual degree program are 112 units, including 78 units in law and 34 units in planning and development. To earn the J.D., all students (including dual degree students) must complete 35 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs.

### Students

Students must have an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills.
Master of Real Estate Development/Master of Business Administration

The Master of Real Estate Development/Master of Business Administration dual degree program enables students to expand their skills in planning, land development, marketing, decision sciences, accounting, management, finance and economics. The program is targeted for students who have a clear career goal of becoming real estate developers but who lack formal training in business. The program normally requires two years (including summers) of full-time study in residence to complete.

Requirements

A total of 82 units is required. Required courses include: all required courses in an MBA program; FBE 565 Economics of Urban Land Use — Feasibility Studies (3 units); FBE 586 Advanced Real Estate Law (3 units); graduate business elective sufficient to bring the total units completed in the USC Marshall School of Business to at least 48; and Policy, Planning, and Development courses (34 units). Dual degree students may not count courses taken outside the USC Marshall School of Business toward the 48 units.

Students must have an approved laptop computer as required by instructors and must demonstrate calculator and spreadsheet skills.

Elective from the Price School of Public Policy | 2

Comprehensive Examination: Students are required to complete a comprehensive examination administered by faculty members from both the Marshall School of Business and the Price School of Public Policy.

Master of Public Administration/Master of Science in Gerontology

The Master of Public Administration/Master of Science in Gerontology (MPA/M.S.) dual degree offers students interested in management of agencies and institutions the opportunity to gain in-depth knowledge of the administrative and organizational processes and management skills necessary for the effective delivery of services to older persons.

In the MPA/M.S. dual degree, students spend their first year taking the required courses in the USC Davis School of Gerontology. The research course, GERO 550 Research Methods and the capstone course GERO 555 Integrating Gerontology: A Multidisciplinary Approach, are taken in the USC Davis School of Gerontology. The student begins courses in the Price School of Public Policy during the second semester of the first year.

Two versions of this dual degree are available, one with a general orientation and one with an emphasis on health services administration. Students must apply to both schools and, if accepted to both, participate in a specially designed program combining course work from both schools.

Curriculum requirements for the general focus dual degree are detailed in the USC Davis School of Gerontology section of this catalogue. Students are encouraged to seek advisement as they plan their actual programs, since curriculum changes may occur.

Master of Health Administration/Master of Science in Gerontology

Gerontology and health administration students can specialize in health care administration (profit and nonprofit) through the dual degree with the USC Davis School of Gerontology and the USC Price School of Public Policy’s Health Administration Program. Students in the dual degree program must be admitted by both academic units and complete 78 units of post-graduate academic work.

</tr>
</tbody>
</table>

Statistics: The statistics requirement for dual degree students is the same as those that apply to the Master of Health Administration.

Program Adaptation: The USC Davis School of Gerontology will waive GERO 589 Case Studies in Leadership and Change Management because students enrolled in this program will have a primary professional focus in health administration.

Students enrolled in the dual degree are not required to take PPD 511 (as opposed to the stand alone MHA degree students) because they develop the necessary proficiencies related to their career goals in long term care administration through other courses such as GERO 550, GERO 591 and GERO 593. In addition, PPD 601 is required for the dual degree (and not the stand alone MHA program) because most of these students will work in long-term care facilities and this course is critical for success in that market.

Any course substitutions are done by petition on an individual basis and should be part of a carefully developed course of study. The USC Price School of Public Policy should be consulted concerning this program of study.

Master of Public Administration/Juris Doctor

The dual degree program with the USC Gould School of Law and the USC Price School of Public Policy enables qualified students to earn a Juris Doctor/Master of Public Administration (J.D./MPA) in approximately four years of study.

Some of the topics covered in the law school are also covered in the program of the Price School of Public Policy, so some credit toward the law degree may appropriately be given for specified graduate work taken in the Price School of Public Policy. Similarly, some credit toward the master’s degree may appropriately be awarded for certain work completed in the law school. The goal of the program is to encourage law students to gain a
recognizes competence in administration, which has a direct relevance for the roles lawyers are asked to play in society.

Students must apply to, and be accepted by, both schools. They may be accepted to a dual degree program at the time of their acceptance to the law school or at the beginning of their second year of law school. The program requires the completion of the required first year of law school and the fulfillment of a statistics prerequisite, which can be met by passing an undergraduate inferential statistics class with a grade of B or better at an approved university within three years of matriculation or taking PPD 502X Statistical Foundations for Public Management and Policy and completing with a grade of "B" or better. To earn the J.D., all students (including dual degree students) must complete 35.0 numerically graded law units at USC after the first year. The associate dean may make exceptions to this rule for students enrolled in law school honors programs.

Credit toward the law degree may not be given for graduate work completed prior to the completion of the first year of law school. The Price School of Public Policy, on the other hand, may allow some credit toward the MPA for approved work completed prior to the first year of law school.

Students are required to complete 97 units of course work.

Curriculum Requirements

First Year Required law school courses

Second and Third Year

*Students who have taken a Price leadership course are not required to take SOWK 611.

**Electives in public administration need to be approved by the graduate adviser in the Price School of Public Policy.

In addition to applying to the Price School of Public Policy, those interested in the program should contact the Office of Admissions, Hebrew Union College — Jewish Institute of Religion, 3077 University Avenue, Los Angeles, CA 90020-2790, for comprehensive information about its requirements.

Public administration course work may be taken in Los Angeles or Sacramento. In Sacramento, a student will complete the Price core and elective courses, will take independent study with a HUC professor, and will serve in an internship while enrolled in HUC fieldwork classes.

Master of Public Administration/Administration

The Master of Public Administration/Administration (MPA/MSW) dual degree offers students interested in careers as administrators of social agencies the opportunity to prepare for social work while developing the administrative capabilities necessary in the public sector. The MPA/MSW requires two calendar years of full-time study. The first academic year is devoted to the standard social work first-year curriculum. During the second year, the curriculum combines social work and public administration course work. The curriculum for both summers will be in public administration.

Students can enter this program only with the written consent of both schools. Students who apply initially to the USC School of Social Work must declare their intention to pursue the MPA/MSW dual degree at the time of their application. If admission is approved, such students will be admitted to the dual degree program. Social work students selecting this program are required to select the Community Organization, Planning and Administration concentration in their second year program.

Students must complete 82 units (54 in social work and 28 in public administration).

Social Work (54 units)

In addition to the above, an elective is defined as one of the following courses (SELECT 14 UNITS):

- PPD 675 Nonprofit Management and Leadership
- PPD 684 Leadership Development in the Public and Nonprofit Sectors
- PPD 685 Human Resources Management in Public and Non-Profit Sectors
- PPDE 689 The Nonprofit Sector and Philanthropy
- PPDE 646 Grant Writing Practicum
- PPDE 649 International Development

In addition, students may be requested by petition to the graduate adviser in the Price School of Public Policy to complete the Price core and elective courses, will take independent study with a HUC professor, and will serve in an internship while enrolled in HUC fieldwork classes.

Regulations Concerning a Second Master's Degree

For rules governing a second master's degree, see the Requirements for Graduation page. In accordance with these policies, transfer credits will be granted only on the basis of a written petition to the MPA program coordinator and on the basis of credits recognized by USC in a Transfer Credit Statement.

Teaching Opportunities

Students may want to prepare for teaching as well as for public service. By careful planning in the upper division of the undergraduate degree and during the graduate years, requirements for a bachelor's degree, a master's
degree and the university recommendation for a community college instructorship may be met without unnecessary duplication of effort and waste of time. Those interested in teaching should consult advisers in both the USC Price School of Public Policy and the USC Rossier School of Education before beginning upper division and graduate work.

Public Administration Professional Sequence with the Viterbi School of Engineering

Regulations governing the Master of Science in Civil Engineering permit some candidates for this degree to take 12 units outside the School of Engineering. Those who wish to do so may take 12 units in public administration. Two courses in this sequence must be selected from among PDD 500, PDD 504ab, PDD 540, PDD 541, PDD 545, PDD 546. One course in this sequence must be selected from among PDD 542, PDD 557, PDD 666. PDD 541 requires PDD 502x and statistics as prerequisites. PDD 546 should be taken last if elected.

Joint Degree Programs

Master of Long Term Care Administration

This program is designed to prepare competent individuals to administer the long term care needs of America’s elderly population. It is jointly offered by the Davis School of Gerontology, the Marshall School of Business, and the Price School of Public Policy. For information see the USC Davis School of Gerontology.

Master of Science in Health Systems Management Engineering

For information, see Industrial and Systems Engineering.

Doctoral Degrees

Doctor of Philosophy in Public Policy and Management

Doctor of Philosophy in Urban Planning and Development

The Price School offers two Ph.D. programs. Both the Doctor of Philosophy (Ph.D.) in Public Policy and Management and the Doctor of Philosophy (Ph.D.) in Urban Planning and Development degree programs are under the jurisdiction of the Graduate School. Students should also refer to the Graduate and Professional Education and Graduate School sections of this catalogue for general regulations. All courses applied toward the degrees must be courses accepted by the Graduate School.

The Ph.D. programs in the Price School both emphasize rigorous programs of advanced study and research, stressing qualitative or quantitative analysis and the theoretical foundations of their field of study. The programs are designed to provide students with the opportunity to develop their own specialization and expertise in either major field — public policy and management or urban planning and development — while also offering them a breadth of knowledge in an especially rich intellectual environment.

Curriculum Requirements

The Doctor of Philosophy in Public Policy and Management and the Doctor of Philosophy in Urban Planning and Development are administered by the doctoral committee of the school. The Ph.D. program in Public Policy and Management requires the completion of 60 units of course work, comprising the following elements: master’s core in a substantive field (15-17 units), theoretical core (11-12 units), methodology (10-12 units), field/specialization courses (12 units), teaching seminar (2 units), research seminar (4 units) and dissertation (4 units minimum). The Ph.D. program in Urban Planning and Development requires the completion of 60 units of course work, comprising the following elements: master’s core (14-16 units), doctoral core (8 units), methodology (10-12 units), field/specialization courses (16 units), teaching seminar (2 units), research seminar (4 units), and dissertation (4 units minimum).

<tr>
<td>PDD 712 Seminar in Public Policy</td>
<td>4</td>
</tr>
<tr>
<td>PDD 713 Political Economy and Institutional Analysis</td>
<td>4</td>
</tr>
</tbody>
</table>

*Students may petition to substitute PDD 715 with a different theory course derived from a discipline. Examples include MOR 602, ECON 500, etc.

Methodology (10-12 Units)

<table>
<thead>
<tr>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PDD 706 Paradigms of Research and the Design of Inquiry</td>
</tr>
<tr>
<td>PDD 558 Multivariate Statistical Analysis, or ECON 513 Practice of Econometrics</td>
</tr>
<tr>
<td>One additional methods course selected with qualifying exam committee approval</td>
</tr>
</tbody>
</table>

Field Courses (12 units)

Students select 12 units of field courses which can be used to develop disciplinary expertise related to specialization interest or additional methodological expertise. Fields are developed with qualifying exam committee approval, can include any combination of the Price School and outside courses and are unique to each student.

Research Seminar (4 units)

Students will take PDD 700ab (2 units each, 4 total units), the Price School research seminar course.

Teaching Seminar (2 units)

Students will take two semesters of the teaching seminar, PDD 700ab (1 unit each, 2 total units).

Ph.D., Doctoral Core (8 units)

PPD 713 Advanced Planning Theory

PPD 714 Advanced Urban Development

Methodology (10-12 units)

<table>
<thead>
<tr>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PPD 706 Paradigms of Research and the Design of Inquiry</td>
</tr>
<tr>
<td>Additional methods course selected with qualifying exam committee approval</td>
</tr>
</tbody>
</table>

Specialized Field Courses (16 units)

Students take a minimum of four courses to develop their specialized area of study. Courses may be taken in the Price School or other USC units. Students, working with their qualifying exam committees, have considerable flexibility in forming specializations.

Research Seminar (4 units)

Students will take PDD 700ab (2 units each, 4 total units), the Price School research seminar course.

Teaching Seminar (2 units)

Students will take two semesters of the teaching seminar, PDD 700ab (1 unit each, 2 total units).

Research Seminar (4 units)

For the Ph.D. in Urban Planning and Development, possible courses include:

<table>
<thead>
<tr>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PDD 500 Intersectoral Leadership</td>
</tr>
<tr>
<td>PDD 501ab Economics for Policy, Planning and Development</td>

</tr>
<tr>
<td>PDD 537 The Social Context of Planning</td>
</tr>
<tr>
<td>PDD 614 Institutional and Policy Issues in Transportation</td>
</tr>
</tbody>
</table>

Admission with Advanced Standing

Students entering the doctoral program with a master’s degree from a accredited institution in public management/administration, public policy, planning, or urban development or related field may be admitted with advanced standing to either Ph.D. program. In the Public Policy and Management program, students must complete a minimum of 39-41 units of doctoral classes beyond that graduate degree, exclusive of 794ab doctoral dissertation units, for a minimum of 43-45 semester units. In the Urban Planning and Development program, students must complete a minimum of 40-42 units of doctoral classes beyond that graduate degree, exclusive of 794ab doctoral dissertation units, for a minimum of 44-46 semester units. Additional course work may be required if deemed necessary by the student’s faculty following the screening examination.
A maximum of 6 units of transfer credit may be applied toward a doctoral degree with advanced standing. Only course work not used to complete the master’s degree described above is available for transfer credit. No exceptions are allowed.

Qualifying Exam Committee

Students will form an initial qualifying exam committee by the end of the first fall semester, which officially oversees the development of the student’s academic program through the qualifying examination. Five tenure or tenure track committee members are designated to provide guidance in the field developed by the student. A minimum of three members, including at least one tenured member, must be from among the faculty participating in this Doctor of Philosophy program, and at least one member must be from outside the Price School of Public Policy. Students should refer to the Graduate School section regarding the qualifying exam committee and the outside member. The complete qualifying exam committee must be in place no later than the third semester.

Screening Procedures

Students must have a 3.3 overall GPA in first-year courses to continue in the program.

Work Plans

At the end of each spring semester, the student submits an academic work plan for the coming year to his or her qualifying exam committee chair. The plan should include courses, degree progress, seminar attendance and what was learned from those, and a research plan that articulates the major research questions being explored. At the conclusion of year one, the chair reviews and approves the work plan and at the end of year two, the chair reviews the work plan and the second year paper.

Qualifying Examination

The qualifying exam committee prepares a comprehensive written examination covering the fields of study. Following completion of the written portion, the entire committee conducts an oral examination of the student, focusing on material both complementary and supplementary to the written examination but relevant to the field and overall program selected by the student. Upon passing both portions of the qualifying examination, the student becomes a candidate for the Doctor of Philosophy degree. The qualifying exam will occur in the fall of year three.

Proposal Defense

Students are expected to have a proposal defense within one year of passing the qualifying exam.

Doctoral Dissertation

The dissertation is based on original research. The research is supervised by a dissertation committee of three or more regular USC faculty, at least one of whom must be from outside the Price School of Public Policy. A two-semester minimum registration in PPD 794 is required of all candidates. Students must maintain continuous registration until completion of the dissertation.

Defense of the Dissertation

Oral defense of the dissertation before the dissertation committee is usually made on a preliminary draft.

Format for Theses and Dissertations

All theses and dissertations submitted in fulfillment of requirements for graduate degrees must conform to university regulations with regard to format and method of preparation. Regulations for Format and Presentation of Theses and Dissertations is available from the Graduate School, Grace Ford Salvatori 315, or online at the Graduate School Website.

General Requirements

Refer to the Graduate School section in this catalogue for policies regarding time limits, leave of absence, scholarship standing and probation.

Doctoral Degrees

Doctor of Policy, Planning, and Development

Planning and development are critical concerns of the nation and the world today. Whether redesigning the health care system, reproducing economic innovation in our central cities, or facilitating economic and social relationships across the globe, planners and developers are on center stage.

Leading the way into the next century will be a group of experienced practitioners who have updated and expanded their professional achievements by developing additional conceptual and research competency through the Doctor of Policy, Planning, and Development (DPPD).

The goals of the program are: to create a unique educational environment that will forge these professionals into a cadre for urban change; to develop urban professionals who can merge development and planning tools to design new integrative policy planning and implementation systems; to establish a set of new problem solving paradigms for examining and altering planning and development decision-making and to equip professionals with sophisticated analytical tools and a sharper cultural awareness so they can practice planning and development anywhere in the world.

Admission

The program is intended for people with considerable professional experience and intellectual interests. Requirements for admission include: GPA of 3.0 (A = 4.0) for all post-high school academic work, and, for international students, submission of TOEFL or IELTS scores; five letters of recommendation, including at least one academic and one professional; five or more years of professional experience; a resume and, if appropriate, a portfolio; and a study prospectus detailing a proposed field of study. Guidelines for preparing the prospectus are included in the application package. Additional requirements for international students are listed under Admission of International Students. The GRE and GMAT are neither accepted nor required for the DPPD program. Each application will be examined with the aim of admitting an applicant whose study prospectus suggests the ability and focus to produce an innovative approach to professional practice.

Applicants are expected to hold a master’s degree in architecture, landscape architecture, public administration, real estate development, urban/city/regional planning, urban design or a closely related field. Applicants with master’s degrees in other fields will be expected to complete foundation courses prior to entering the degree’s core classes.

Upon admission to the program, each student will be assigned a faculty adviser who will oversee his or her program.

Curriculum Requirements

The Doctor of Policy, Planning, and Development is administered by the Price School of Public Policy for full-time and part-time students. The DPPD requires completion of 60 units of course work comprising the following elements:

<table>
<thead>
<tr>
<th>Requirements</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>

<td>4</td>
</tr>
</tbody>
</table>

Foundations Courses

Up to 20 units of foundation courses are required. These courses may be taken from the school’s master’s degree programs or, with prior approval, from other USC graduate degree programs. Students who hold a related master’s degree may be admitted with advanced standing. Students are required to complete 36 units of course work and 4 units of PLUS 69A (project units).

<table>

Conspectus Preparation

PLUS 692 Conspectus Preparation

Methods

A student’s methods course should be approved by the student’s Professional Advisory Committee. Possible courses include:

<table>
<thead>
<tr>
<th>Courses</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>PLUS 612 Analysis of Quantitative Data</td>
<td>4</td>
</tr>
<tr>
<td>for Planning and Development</td>

</tr>
<tr>
<td>PPD 707 Survey Research Methods</td>
<td>4</td>
</tr>
<tr>
<td>PPD 708 Qualitative Methods</td>
<td>4</td>
</tr>
</tbody>
</table>

Screening Process

As quickly as possible, the student will form a Professional Advisory Committee consisting of the student’s adviser and two other school and/or USC faculty and up to five professionals whose activities are related to the student’s. This committee shall oversee the student’s program to its conclusion. At the completion of no more than 16 units beyond the foundation courses and/or PLUS 603 and PLUS 623, students will complete a written examination which will consist of responding to a short list of specific planning and development problems using appropriate professional paradigms. The student will then meet with the Professional Advisory Committee to formally review the student’s progress toward the degree.

Field of Study

In consultation with their faculty adviser and Professional Advisory Committee, students will craft a field of study related to the professional arena of practice. The field may or may not reflect standard academic boundaries, such as transportation and land use planning. Students should take advantage of USC resources in developing the field, especially taking into consideration the relationship of practice to theory and context. Twenty units of course work are required for the field of study, 8
of which may be taken outside the Price School of Public Policy.

Conспектus Preparation

In PLUS 692 students complete a professional conspectus that defines their field of study, its structure and place within professional practice, and other related questions. The conspectus will be presented to the student’s Professional Advisory Committee for acceptance. Only after it is accepted may the student proceed to the Planning, Design and Development Project.

Planning, Design and Development Project

The capstone project of the OPPD is the student’s completion of the Planning, Design and Development Project (PDDP). The PDDP is a study of an aspect, site, issue or other such element of professional practice. Each PDDP should be designed to present an innovative or original contribution to the practice of planning and development. The parameters of the PDDP are intentionally left wide, allowing the project to be produced as solely text, or text in conjunction with film, computer program, design or another multimedia format.

The PDDP is supervised by the student’s Professional Advisory Committee. Students must maintain continuous registration in the PLUS 696 series until completion of the PDDP. Upon completion of an approved draft of the PDDP, students will present their findings in an open session, but the Professional Advisory Committee is the sole evaluator.

General Requirements

This degree is administered by the Price School of Public Policy. At least 24 units must be fulfilled in residence at USC. The total length of the study must not exceed six academic years. Students are encouraged to actively participate in a non-credit Price School of Public Policy doctoral workshop. Policies regarding time limits, leave of absence, scholarship standing, academic warning, and other issues not directly addressed are consistent with those of the Graduate School. Please consult the Academic Policies, Graduate and Professional Education and the Graduate School sections for additional information.

Courses of Instruction

The terms indicated are expected but are not guaranteed. For the courses offered during any given term, consult the Schedule of Classes.

Health Care Management (HMGT)

HMGT 510 The Dynamics of Health Care Leadership (4) A five-day residential provides an intensive, multi-faceted learning experience in leadership, communication, managed care, systems thinking, and the health care environment. Open to EMHA students only.

HMGT 511 Information Technology and Patient Engagement (2, FaSpSm) Strategic management and utilization of healthcare information technology in the delivery of healthcare; patient engagement and the use of technology to facilitate participation in their own care. Open only to Executive Master of Health Administration students.

HMGT 520 Leading People and Health Care Organizations (4, Fa) An exploration of contemporary work force issues and skills development in organizational design, performance measurement, teamwork, conflict resolution, leadership, and change management. Open to EMHA students only.

HMGT 525 Managed Care Operations (4) Focuses on managerial, operational, and organizational aspects of managed care for integrated delivery systems, health plans, and medical groups. Open to EMHA students only.

HMGT 540 Health Economics, Financing and Reimbursement (2, Fa) A framework for the economic analysis of health care issues and provides students with an opportunity to apply economic methods to a number of actual health care problems. Open to EMHA students only.

HMGT 545 Systems Thinking and the Analysis of Data (4) Quality improvement and statistical tools for health managers. Covers analyzing processes; collecting and analyzing operational data; drawing valid conclusions from data. Open to EMHA students only.

HMGT 550 Law, Regulation, and Ethics (4) An intensive introduction to business and health care law, ethics and regulation; gives executives practical knowledge regarding legal consideration in business transactions. Open to EMHA students only.

HMGT 560 Customer-Focused Health Care Organization (2) Strategies for gaining and using customer-derived data in planning, marketing and managing health care organizations. Open to EMHA students only.

HMGT 565 Managing the Organization’s Financial Health (4, Fa) Executive confront and solve problems requiring use of accounting, finance, and management control principles; provides core financial skills for non-finance professionals. Open to EMHA students only.

HMGT 570 Strategic Management (4, Sm) Provides skill development and application in the integrative discipline of strategic management including assessment, strategy formulation, implementation and control. Open to EMHA students only.

HMGT 575 Managing and Improving Health (4, Sp) Methods for monitoring and improving the health of populations. Topics include outcomes management, risk-adjustment, development and implementation of practice guidelines. Open to EMHA students only.

HMGT 600 Managing Risk (2, FaSp) Overview of reimbursement models in clinical and institutional settings; legal, financial and clinical assumption of risk pursuant to new and evolving federal and state statutory and regulatory provisions. Open only to EMHA students.

HMGT 601 Operations Management for Accountability (4, FaSp) Hospital operations in the inpatient/ outpatient setting; special emphasis on the growing requirement to more effectively manage across the continuum of care while assuming greater accountability in the delivery of care. Open only to EMHA students.

HMGT 602 Operational Efficiency Processes in Health Care Organizations (4, FaSp) Improving productivity and efficiency of health care organizations combining the application of key operational analysis principles to improve quality, speed and productivity in the delivery of health care. Open only to EMHA students.

HMGT 603 Developing and Monitoring Quality and Patient Safety Outcomes (2, Sm) Overview of contemporary methods used to develop and monitor patient quality and safety outcomes; develop skill in data collection and analysis of clinical care outcomes; focus on operationalizing outcomes that matter to payers, organizations, and clinicians. Open only to EMHA students.

Urban and Regional Planning (PLUS)

PLUS 600 Environmental Goods in Planning and Development (4, Irregular) Production, distribution, and valuation of environmental goods with attention to amenity concepts, externalities, public goods, consumer behavior; as characterized in economics, political science, sociology, and psychology.

PLUS 601 Advanced Planning Theory (4, Fa) Value hierarchies, means-ends continuums, and the nature of social action; problems of prediction and choice under conditions of uncertainty; alternative planning strategies.

PLUS 603 Planning and Development Paradigms (4, Sp) Introduction to historic, prevalent, and alternative paradigms of professional planning and development practice; seminar format and case studies.

PLUS 612 Analysis of Quantitative Data for Planning and Development (4, Fa) Planning and development case study approach to identifying data needs, acquisition, evaluation, manipulation, analysis, and multimedia presentation. Prerequisite: PDD 525.

PLUS 616 Behavioral Issues in Environmental Design (4, Irregular) Planning and design of the physical environment for human activities, e.g., user preferences, privacy, territoriality, stress and adaptation, cognitive mapping, lifestyles.

PLUS 623 Politics of Planning and the Urban Environment (4, Sp) Historic roots of property rights and obligations related to public policy, focus on current issues and discourse.

PLUS 626 Information Systems for Planning and Development (4, 2 years, 5p) Structure, content, and applications of formal information systems in planning and policy making emphasizing social accounts and indicators, censuses, social reporting, and &e20; futures &e21; research.

PLUS 631 Seminar in Physical Planning and Design in Developing Countries (4, Irregular) Issues in comparative urbanism; planning and design in developing countries: slums and squatters, housing and infrastructure, new towns, land policy, conservation and redevelopment, city design.

PLUS 632 National Urban Policy in Developing Countries (4, Irregular) The problems of the primate city, the role of intermediate cities, and the implicit spatial impacts of macro and sectoral policies.

PLUS 633 Seminar in Comparative Housing Policy and Urban Planning Programs (4, Irregular) Comparative examination of urbanization experience in selected areas and cities throughout the world; housing policies, urban planning approaches, financial, administrative, legal, and other techniques.

PLUS 635 Urban Finance (4, Irregular) The theory of fiscal federalism and municipal finance, with examples from the USA and other countries, public/private partnerships in urban development, and government decentralization.

PLUS 640 International Urban Development (4, Irregular) Study of urbanization in developing countries; special attention to urban growth, migration, city size, land use, and urban management. Comparative case studies.

PLUS 680 Advanced Urban and Regional Transportation Planning (4, 2 years, Fa) Social and environmental impacts; incentive structures; alternate travel; investment guidelines; technological change.

PLUS 692 Conspectus Preparation (4, FaSpSm) Preparation of a case study of a specific planning and/or development project that defines the student’s field of study.
PLSU 694abcdz Planning, Design and Development Project (2-2-2-2-0, FaSp) Credit on acceptance of planning, design and development project. Graded IP/CR/NC.

Policy, Planning, and development (PPD)

PPD 100m Los Angeles, The Enduring Pueblo (4, FaSp) Gateway to the minor in Planning and Development. Ethnic history of Los Angeles, emphasis placed on architecture, planning, and development. Multiplicity of cross-connections shaped by race, ethnicity, religion, gender, and sexual orientation. (Duplicates credit in former PLDV 100.)

PPD 327 Urban Planning and Development (4, FaSp) Gateway to B.S., Public Policy, Management and Planning and minor in Planning and Development. City building and development process; who plans, politics of planning and development; major topics include land use, fiscal policy, transportation, sustainability, and economic development.

PPD 340 Citizenship and Public Ethics (4, Fa, Sp) Review of legal and ethical traditions of citizenship with emphasis on the latter; consideration of implications for current practice of public policy-making and management. (Duplicates credit in former PPD 240.)

PPD 245 The Urban Context for Policy and Planning (4, Fa) The urban context for planning and policy decisions. Socioeconomic, physical, and spatial structure of cities; and the underlying demographic, economic, and social processes that drive their ongoing transformation.

PPD 250m Third World Cities (4, FaSp) Gateway to the B.S., Planning and Development. The transition from traditional to modern cities in the developing world. Pracmy and dualism; comparative urbanism as an expression of cultural variation; contrast in Western cities. (Duplicates credit in former PLDV 250.)

PPD 301 PPD Practices: Internship Seminar (2, FaSpSm) Policy, planning, and development skills for practice; internship seminar; leadership; group dynamics and presentation skills; application of management; organizational diversity; reflection on experiences. (Duplicates credit in the former PPD 401.)

PPD 303 Statistics for Policy, Planning, and Development (4, FaSpSm) Statistical applications applied to the real world; techniques including probability, sampling; hypothesis formation and testing; correlation, and linear regression. (Duplicates credit in the former PPD 403.)

PPD 306 Visual Methods in Policy, Management, Planning and Development (4, FaSp) Introduction to graphic design, photodocumentation, and geographic information systems as employed in planning, policy, and development. Visual explanations. Computer and by-hand applications. (Duplicates credit in former PLDV 410.)

PPD 315 Finance of the Public Sector (4, FaSp) Justifications for and effects of government policies; tax and spending sides of government budgets; public goods; externalities; social insurance; redistribution and welfare; tax policy. (Duplicates credit in former PPD 313.) Prerequisite: ECON 203.

PPD 316 Human Resource Management for Public Organizations (4, FaSp) Human resource development and management; values and processes in civil service career systems; training practices; human relations in supervision; personnel theory. (Duplicates credit in former PPD 316.)

PPD 318 Financial Accounting in Public and Nonprofit Organizations (4, FaSp) Basic accounting principles and concepts necessary for the preparation and understanding of financial statements; accounting for service organizations in the public/nonprofit sector; fund accounting. (Duplicates credit in former PPD 351.)

PPD 320 Organizational Behavior in Public Administration (4, FaSp) Understanding human behavior in public organization: motivation, roles, communication; group behavior and decision-making in public context; managing conflict; leadership and change in public complex organizational systems. (Duplicates credit in former PPD 485.)

PPD 325 Fundamentals of Health Policy and Management (4, FaSp) Institutions, policies, and processes affecting health care policy and management; historical and philosophical roots; management of health care delivery; access and quality issues; responsiveness to public needs. (Duplicates credit in the former PPD 230.)

PPD 330 Introduction to Health Care Systems (4, Sp) Concepts and determinants of health and illness; health care delivery organizations and programs; the role of the administrator; issues in health care financing and access; quality evaluation; future trends. (Duplicates credit in former PPD 320.)

PPD 340 The American System of Justice (4, Sp) Irregular) Introduction to the system of justice administration: components — police services, judiciary, corrections; interrelationships and issues; management strategies for change. (Duplicates credit in former PPD 340.)

PPD 342 Crime and Public Policy (4, Fa) Public policy agenda-setting, alternatives formulation, and implementation for crime and criminal justice; analysis of specific issues including crime control, death penalty and gun control. (Duplicates credit in former PPD 342.)

PPD 343 Terrorism, Homeland Security, and Public Policy (4, Fa) Overview of terrorism, government policies and practices, issues of civil liberties, challenges to public sector management.

PPD 351 Introduction to Philanthropy and Grant-writing (4, Fa) History, theories, philosophies, and practices of philanthropy; relationship between philanthropy and nonprofit world; grant-making procedures and relation to social innovation.

PPD 357 Government and Business (4, FaSp) Interrelated roles of business and public institutions; effects of public policies and laws on business sector; incorporates public and business perspectives. (Duplicates credit in former PPD 357.) Prerequisite: ECON 203.

PPD 358 Urban and Regional Economics (4, Fa) Basic concepts of urban and regional economies; how planners intervene in the urban market; housing, transportation, public goods; land use politics; fiscal issues; cost-benefit analysis. (Duplicates credit in former PLDV 403.)

PPD 359 Urban Transportation Planning and Policy (4, Sp) Current transportation planning and policy critiques. Transportation planning; the relationship to urban structure; conventional and para-transit modes; analysis of local plans. (Duplicates credit in former PLDV 480.)

PPD 362 Real Estate Fundamentals for Planning and Development (4, Fa) Urban markets, government role and influences; capital markets and financing environment; mortgage instruments and analytic tools for decision-making. (Duplicates credit in former PLDV 406.)

PPD 371 The Nonprofit Sector and the Public Interest (4, Fa) Theories of the voluntary nonprofit sector in society and its relationship to government and business; public policies toward the sector. (Duplicates credit in former PPD 371.)

PPD 372m Public Service in an Urban Setting (4, Sp) Voluntary service in an urban, multicultural context: diverse meanings and practices, history, motivations, relationship to charity and change, dilemmas, public policies; service learning project required. (Duplicates credit in former PPD 372m.)

PPD 373b International Perspectives on Urban Problem Solving (4, Irregular) Research on comparative urban public policy and administration utilizing case study approach; field research includes study in various foreign cities. (Duplicates credit in former PPD 412b.)

PPD 378 International Development (4, FaSp) Definitions and measurements of development; impact of globalization; concept and practice of international and development administration and planning at local, national, and global governance levels. (Duplicates credit in former PLDV 405.)

PPD 390 General Studies Problems (1-4, Supervised, individual study. No more than one registration permitted. Enrollment by petition only. (Duplicates credit in former PLDV 390 and PPD 390.)

PPD 402 Management of Public and Nonprofit Organizations (4, Fa) Contemporary management theory; the nature of complex organizations; organizational and intergovernmental arrangements; roles and responsibilities of managers; managerial and organizational effectiveness; organizational structure and dynamics.

PPD 403 Management Analysis (1, Sp) Introduction to organizational and systems analysis; historical perspective; systems theory; information systems, procedure analysis; management planning; introduction to models. (Duplicates credit in former PPD 403.)

PPD 405 Fundraising for Policy and Planning (2, Sp) Fundraising in the nonprofit sector; role and structure of philanthropy; strategic issues in the solicitation of private funds for the public good; effect of fundraising on behavior of institutions.

PPD 407 Financial Management of Public and Nonprofit Organizations (4, Sp) Time value of money, risk, government bonds and tax-exempt financing, cost of capital, budgeting, financial statement analysis, and working capital management.
PPD 410 Comparative Urban Development (4, Sp) Urbanization and urban development and growth through an international scope; globalizing cities.

PPD 411abcd Sacramento Semester (4-4-4-4, Irregular) Exploration of political, economic, and administrative climate of the state government; basic processes and functions considered through seminars, research projects, visits, group discussions, and internships. (Duplicates credit in former PPMT 411abcd.)

PPD 412l GeoDesign Practicum (4, FaSp) (Enroll in SSCI 412l.)

PPD 413 Administration of Health Care Organizations (4, Sp) Theory and practice; role of governing bodies, medical staffs and quality review committees; current trends; community responsibility; regulatory and oversight agencies. (Duplicates credit in former PPMT 439.)

PPD 414 Community Health Policy and Planning (4, Sp) Historical perspectives on and the contemporary practice of community health planning; impact of culture, socioeconomic, and environment; policy dimensions; urban planning’s role in enhancing and sustaining health.

PPD 415 Health Policy (4, Sp) Health policy analysis and challenges; price of health; structure of major sectors in health care; role of insurance in policy debates; trade-offs with policy decisions. Prerequisite: PPD 325.

PPD 416 Food Policy and Planning (2, Sp) Key issues related to the practice of food system planning: planning for and implementing food policies; understanding of food systems; issues around community food governance.

PPD 417 History of Planning and Development (4, Sp) Historical evolution of planning and development. How changing modes of planning and development have shaped the built landscape throughout the century. (Duplicates credit in former PLDV 447.)

PPD 420 Environmental Impact Assessment (4, Sp) Exploration of the role of the National Environmental Policy Act and the California Environmental Policy Act; study of environmental impact assessments including the regulatory aspects, stakeholder and participatory processes, and legal framework.

PPD 421 Art and the City (4) Role of art in modern society with a particular emphasis on the urban context including public spaces, the process of gentrification, and redevelopment; theoretical and research approaches.

PPD 425 Designing Livable Communities (4, Fa) Theories and concepts of livable communities and good city form; case studies of historical and current best practices; field visits; collaborative design project. (Duplicates credit in former PLDV 447.)

PPD 427l Geographic Information Systems and Planning Applications (4, Fa) Basic GIS concepts, ArcView and other GIS software, planning applications and databases, basic cartography; students select, research and prepare a planning GIS analysis project.

PPD 429 Urban Design Practicum (4, Irregular) Application of design concepts and graphic skills to a local design problem sponsored by a local public or private client in a studio setting; site visits, community contact, presentations. (Duplicates credit in former PLDV 447.) Prerequisite: PPD 306, PPD 425.

PPD 431 Undergraduate Policy, Planning, and Development Studio (4, FaSp) Application of methods in the exploration of a specific project, policy, or organization from the multiple perspectives of the five tracks in the undergraduate program. Open only to seniors.

PPD 435 Analyzing Real Estate Markets for Planning and Development (4) Macro- and micro-analysis of urban property markets (residential, commercial, and industrial) with regard to their location and dynamics. (Duplicates credit in former PLDV 447.) Recommended preparation: PPD 362.

PPD 437 Advanced Finance and Investment for Planning and Development (4, FaSpSm) Advanced real estate principles. The nature, operation, and role of U.S. mortgage markets. Mortgage financing of residential and income-producing property types. (Duplicates credit in former PLDV 447.) Prerequisite: PPD 362, MATH 117.

PPD 438 Local Economic Development (4, Fa) Economic development in a capitalist system; historic review, sector review, funding, strategizing, partnerships, evaluation; class project. (Duplicates credit in former PLDV 447.)

PPD 439 Housing and Community Development (4, Fa) Evolution of government housing and community development programs; present practices, e.g., housing elements, economic development, neighborhood rehabilitation; housing needs and market analysis; housing and health. (Duplicates credit in former PLDV 447.)

PPD 440 Management of Justice Systems (4, Irregular) Social controls and delivery of justice administration services; comparative systems; organization theory and justice administration; system adaptation and change; system performance measurement: economy, efficiency, effectiveness. (Duplicates credit in former PPD 447.)

PPD 441 Judicial Administration (4, Irregular) Local, state, federal judicial systems; constitutional, legislative, judicial influences on administrative action. Administrative problems associated with judicial functions including district attorney, public defender, the courts. (Duplicates credit in former PPD 447.)

PPD 442 Administration of Police Services (4, Irregular) Police and society; the structure and organization of American policing, current managerial problems; police research and development; future planning; administration of police juvenile programs. (Duplicates credit in former PPD 447.)

PPD 452 Organization and Interface of Juvenile Justice Subsystems (2, FaSp) Effective interface among juvenile justice subsystems (police and social service agencies, schools, courts); legal/jurisdictional parameters, resource constraints; strategies for joint intervention and problem resolution. (Duplicates credit in former PPD 452.)

PPD 453 Program, Policy, and Legislative Trends in Juvenile Justice (2, Irregular) Examination of current research findings and legislation in juvenile justice; relations of new information to operating assumptions of agencies; impacts, trends; implications for management practice. (Duplicates credit in former PPD 453.)

PPD 454 Problems and Issues in the Delivery of Youth Services (2, Irregular) Strategies for coordinated mobilization of diverse juvenile justice agencies; resolution of conflicting agency objectives (e.g., enforcement vs. rehabilitation). Information and resource needs; organizational skills, techniques. (Duplicates credit in former PPD 454.)

PPD 461 Sustainable Communities, Policy and Planning (4, FaSp) Policy and planning as shaped by sustainability theories; sustainability indicators; topics include water resources, air quality, land use regulations, environmental design, carrying capacity, ecological footprint analysis.

PPD 466 Urban Government and Management (4, Irregular) Preparation and discussion of cases dealing with selected policy areas including transportation, housing, poverty, and environmental quality. (Duplicates credit in former PPMT 447.)

PPD 468 Cross-Cultural Negotiations: Communication and Strategy (4) (Enroll in COMM 468)

PPD 475 The Future of California (4) (Enroll in MDA 475)

PPD 476 Politics and Administration (4, Sp) Administrative relationships to the policy processes; influence of political and economic pressures on administrative policy determination; political behavior by administrators; case analysis. (Duplicates credit in former PPMT 446.)

PPD 479 Social Innovations (4, Fa) Strategies and processes of social innovation and change; examination of social change in the market, government, and within the nonprofit sector; dynamics; civic action and activism.

PPD 482 Comparative Public Administration (4, Sp) Methodology, theories, and models of comparison; functional processes of administration in developing and developed nations compared; role of bureaucracy in development and nation-building; ecology of administration. (Duplicates credit in former PPD 482.)

PPD 485m U.S. Immigration Policy (4, Fa) Examination of the historical and contemporary components of U.S. immigration policy with emphasis on policies addressing legal permanent immigrants, refugees, asylees, the undocumented.

PPD 490x Directed Research (1-8, max 12, FaSpSm) Individual research and readings. Not available for graduate credit. (Duplicates credit in former PLDV 490x and PPMT 490x.)

PPD 497ab Senior Thesis (2: a, Fa; 2: b, Sp) Writing of the honors capstone project in an area of interest related to the track of study; research and writing skills. Open only to seniors.

PPD 498 Senior Honors Seminar (4, FaSpSm) Concepts, theories, and methods of analysis of a selected topic within the fields of public policy, management and planning. Students must have a 3.5 GPA in PPD courses; 3.0 GPA overall.

PPD 499 Special Topics (2-4, max 8, FaSpSm) Selected topics in Policy, Management and Planning. (Duplicates credit in former PLDV 499 and PPMT 499.)

PPD 500 Intersectoral Leadership (2) Roles of public, private, nonprofit, and civil society sectors in policy, planning, and development. Leadership skills in negotiation, conflict resolution, institutional design, problem solving.

PPD 501ab Economics for Policy, Planning and Development (2-2): a) Microeconomic theory as applied to policy, planning, and development; concepts of efficiency; macroeconomic issues; b) Microeconomic analysis and modeling to incorporate Market failure and issues of uncertainty and information failure; organization models; policy instruments; policy and planning applications.

PPD 502x Statistical Foundations for Public Management and Policy (2, FaSp) Statistical analysis concepts and reasoning; sampling and data sources; focus on basic statistical applications in public management and policy analysis. Not for graduate credit for MHA, MPA, MPP and affiliated degrees.

PPD 507x Six-Sigma Methods and Applications (3, FaSpSm) (Enroll in ISE 507)
PPD 508 Health Care Operations Improvement (3, Sp) (Enroll in ISE 508)

PPD 509 Problems and Issues in the Health Field (4, FaSp) Principles of epidemiology; disease trends, treatment efficacy, influences on utilization; health promotion, disease prevention and health protection; intergovernmental relationships; management of public health programs. (Duplicates credit in former PUAD 530.)

PPD 510ab Financial Management of Health Services (4, FaSp) a: Accounting principles, financial reports, managerial finance, financial planning, capital investments, working capital analysis; elements of budgeting and reimbursement; performance standards; reporting; developing a management system. Open only to graduate students. Prerequisite: PPD 516; recommended preparation: PPD 502x or competence in statistics. b: Changing practices, emerging issues, strategies and innovations in financial planning, management, and regulation; federal and state policies and requirements. PPD 511 Health Information Systems (2, FaSm) Conceptual framework for data base development; relational data management; use of health statistics; health indicators; confidentiality, security, privacy. Recommended preparation: PPD 502x or competence in statistics and PPD 516 or competence in accounting.

PPD 512 Health Administration Residency Seminar (2, max 4, Sp) Supervised study of health care administration, professional staff relations, internal operations and controls, legal and regulatory requirements, management policy and strategy. (Duplicates credit in former PUAD 533.) Prerequisite: PPD 509, PPD 510a, PPD 545; minimum of 20 graduate level units.

PPD 513 Legal Issues in Health Care Delivery (2, FaSp) Rights of consumers; health-related powers of governments; rights and responsibilities of health care providers; interrelationships of rights, powers, and responsibilities. Open only to graduate students. Recommended preparation: PPD 509 or substantial prior work experience in health care organizations.

PPD 514 Economic Concepts Applied to Health (4, FaSpSm) Relationships between economic characteristics and health status; impact of economy on health services industry; demand and resources for health services; utilization, prices, costs, health insurance. (Duplicates credit in former PUAD 531.) Prerequisite: PPD 509a.

PPD 515 Strategic Management of Health Organizations (4, FaSpSm) Application of principles of health administration in several practice settings. Decision-making, strategic management; organizational performance; communication; provider comparisons. Prerequisite: PPD 510a or HMGT 565, PPD 545 or HMGT 520; recommended preparation: PPD 509, PPD 511, PPD 513, PPD 545, PPD 557.

PPD 516 Financial Accounting for Health Care Organizations (4) Accounting as a management tool; accounting systems; basic accounting concepts and procedures; budgets; financial statements. Open only to graduate students.

PPD 517 Concepts and Practices in Managing Health Care Organizations (2, FaSm) Application of principles of health administration. Role of managers; managing people and programs; human resource management concepts and applications; working with professionals; governance; public relations.

PPD 518 Quality of Care Concepts (2, Sp) Quality issues and complexities affecting health care; fundamentals of quality improvement programs; examination of quality issues and improvement programs in various health care venues; strategies.

PPD 519 Methods and Applications of Health Services Research (2, Fa) Examination of policy and management issues for empirical research; indicators and measurement of outcomes; impact on policy and management decisions; methodology; analysis of quantitative and qualitative data. Prerequisite: PPD 514.

PPD 520 Economic Approaches to Health Policy Analysis (2, Sp) Evaluation of current major health policy challenges and issues; economic analysis of behavioral responses to change in health care policy; new legislation; policy trade-offs. Prerequisite: PPD 514.

PPD 521a Information Technology Management Systems in Health Care (2-5, Sm) Principles and methods of systems analysis; assessment; strategic planning; design consideration; e-health and e-commerce system trends; health care information systems application areas; regulatory requirements. Prerequisite: PPD 511. Fa: Analytic methods used to develop data-driven solutions; specific problems in health care organizations; integrating data; communicating data; interpretation; exploration of new approaches for improvement.

PPD 524 Planning Theory (2, Fa) Development of a critical perspective by becoming more aware of the intellectual roots of the planning profession, with a focus on practical outcomes of actions. (Duplicates credit in former PLUS 501.)

PPD 525 Statistics and Arguing from Data (2, FaSp) Fundamentals of probability and statistics, planning analysis techniques, computing standards, and understanding of the rhetoric related to statistical analysis. (Duplicates credit in former PLUS 502.)

PPD 526 Comparative International Development (2, Fa) Introduction to comparative international development with a focus on regional growth and urban development. (Duplicates credit in former PLUS 505.)

PPD 527 The Social Context of Planning (2, Sp) Examination of the formation of the modern urban environment with its consumer culture, social classes, and racial and ethnic diversity. (Duplicates credit in former PLUS 506.)

PPD 529 Legal Environment of Planning (2, Sp) Understanding of the legal system and its processes and laws applicable to land use and development and the legal nature of powers of public and private entities. (Duplicates credit in former PLUS 509.)

PPD 530 Historical Analysis of Urban Form and Planning Practice (2, Sp) Awareness, analysis, understanding, and influencing the city building process locally and regionally; isolate and exercise tools and methods of visual literacy. (Duplicates credit in former PLUS 510.)

PPD 531 Planning Studio (4, 8, 12, max 12, FaSp) Application of methods in planning, programming, research, and evaluation in a professional context; data collection and analysis; case studies; practical applications. (Duplicates credit in former PLUS 526L and PLUS 676L.)

PPD 532 International Planning and Development Laboratory Workshop (4-8, 5m) Application of planning principles and methods to specific urban planning problems abroad; involves preparation in the spring semester and an overseas field visit and a collaborative practicum. (Duplicates credit in former PLUS 575L.)

PPD 533 Planning History and Urban Form (2) History of urban planning with an emphasis on the evolution of how planning shaped the physical environment in response to political, economic, and social issues.

PPD 540 Public Administration and Society (4, FaSpSm) Administrative concepts, institutions, legal systems, and practices; values; facilitation of responsibilities and rights; professional applications for personal, private sector, and public achievement. (Duplicates credit in former PUAD 500.)

PPD 541 Public Financial Management and Budgeting (4, Fa) Financial management applied to public and nonprofit organizations; financial valuation, financial markets, budgeting, tax administration, debt financing, cost-benefit analysis and financial analysis. (Duplicates credit in PPDE 645.)

PPD 542 Policy and Program Evaluation (4, Sp) Methods and models for policy and program evaluation; methods of collecting and analyzing evaluation data; processes for linking evaluation to policy formulation and program management. (Duplicates credit in former PUAD 525 and former PUAD 528.) Prerequisite: PPD 502x.

PPD 543 Internship Seminar (1, FaSp) Supervised study of management, analytical, or other professional activities in government; integration of theory, practice and relevant literature. (Duplicates credit in former PLUS 544.)

PPD 544 Human Behavior in Public Organizations (4, FaSpSm) Behavior in organizations; focus on personal, interpersonal, and group level factors that influence such behavior. (Duplicates credit in former PUAD 546.)

PPD 546 Capstone in Public Administration (4, FaSpSm) Constitutionally accountable and ethical practice, individually and organizationally; applications of core competencies; practical inquiry, analysis, systems; comparative frameworks; citizenship and public service. Prerequisite: PPD 540 and PPD 545; and PPD 542 or PPD 557 or PPD 666. Open only to master and doctoral students.

PPD 552 Managing and Financing Public Engineering Works (3, FaSpSm) (Enroll in CE 552)

PPD 554 Foundations of Public Policy Analysis (2, Fa) Introduction to public policy analysis; issue diagnosis and policy design; analytic reasoning and argumentation; the role of the public policy professional; ethical issues in policy analysis. Open only to MPP students and Certificate in Public Policy students.

PPD 555 Public Policy Formulation and Implementation (4, Sp) Political and organizational perspectives on policy making process; agenda setting; policy design, adoption, implementation, evaluation, modification or termination. Policy leadership skills: negotiation and strategic mapping. (Duplicates credit in former PPD 559.)

PPD 557 Modeling and Operations Research (4, FaSpSm) Management science methods that support decision making in policy, management, and planning settings. Includes linear programming, queuing theory, decision analysis, and forecasting. Open only to master’s or doctoral students. Prerequisite: PPD 502x or PPD 525.

PPD 558 Multivariate Statistical Analysis (4, FaSp) Applied multivariate statistics in support of policy, management, and planning problem solving; includes regression analysis, logit models, and an introduction to time-series models and multi-equation estimation. Open only to master’s and doctoral students. Prerequisite: PPD 502x or PPD 525.

PPD 559 Policy Implementation and Evaluation (4, FaSp) Theoretical approaches, critical issues, and research methods in public policy implementation. Field-based research project. (Duplicates credit in former PUAD 570.)

PPD 560 Methods for Policy Analysis (4, Sp) Examination of methods used in the analysis of policy methods, including cost benefit analysis, decision and risk
development policies and programs. (Duplicates credit in former PLUS 547.)

PPD 625 Planning and Economic Development Finance (4, Fa) Fundamentals for economic development professionals and policy makers including feasibility analysis and the financing of facilities, social services, and community-based enterprises. (Duplicates credit in former PLUS 546.)

PPD 626 Public/Private and Mixed Enterprises Planning (3, Sp; 4, Fa) Case studies of planning and public/private and mixed enterprises; public production of private goods; privatization of public services; public/private partnerships; mixed enterprises.

PPD 627 Design Skills for Urban Planners (4, Fa) Develop observation, description, analysis, and conceptualization skills related to urban spatial conditions; advance professional communication proficiencies. (Duplicates credit in former PLUS 573.)

PPD 628 Urban Planning and Social Policy (4, Irregular) Urban planning and social work: theory, values, techniques of inquiry, and problem-solving methods appropriate to urban planning and social work. (Duplicates credit in former PLUS 552.)

PPD 629 Planning in the Voluntary Nonprofit Sector (4, Irregular) Structure of voluntary nonprofit sector; role in social, economic, and spatial planning; corporate philanthropy; foundations; pass-through organizations; nonprofit planning requirements. (Duplicates credit in former PLUS 545.)

PPD 630 Urban Economic Analysis (4, Sp) Economic models of cities and city development and structure; housing and land markets; transportation systems; problems of congestion and pollution; evaluation of urban policies. (Duplicates credit in former PLUS 566.)

PPD 631 Geographic Information Systems for Policy, Planning, and Development (3) Introduction to GIS systems and usage in the public sector; spatial data; understanding software and the application of technology; analysis of data using GIS.

PPD 632 Planning Analysis and Evaluation (4, Sp) Methods of policy, program, and plan evaluation: economic principles and theoretical concepts introduced, followed by case studies. (Duplicates credit in former PLUS 574.)

PPD 633 Urban Transportation Planning and Management (4, 2 years, Fa) Background applications of established urban travel forecasting procedures; land use; trip-generation, trip-distribution, modal-choice, trip-assignment; evaluation; criticisms. (Duplicates credit in former PLUS 580.)

PPD 634 Institutional and Policy Issues in Transportation (4, Sp) Analysis of policies relating to transportation alternatives; institutional environment and background; federal, state, regional, and local agency responsibilities and interactions. (Duplicates credit in former PLUS 581.)

PPD 635 Principles of Transportation Systems Analysis (4, Fa) Planning, design, modeling, and operation of inter- and intra-urban transportation networks. Analysis of contemporary engineering-economic issues relevant to transport, especially questions pertaining to infrastructure. (Duplicates credit in former PLUS 582.)

PPD 636 Infrastructure and Modern Society (2, Sp) Survey of infrastructure issues that relates principles from multiple disciplines to the provision of vital services and encourages critical thinking within a systems context.

PPD 637 Forecasting and Urban Planning: A Survey of Theory and Methods (4, Sp) Overview of forecasting methods and applications in urban planning processes used to determine urban futures; includes theoretical and institutional factors as well as quantitative methods.

PPD 638 Integrative Seminar (4, FaSpSm) Individual research and preparation of an integrated comprehensive study coordinated with a sponsor such as a government agency or development firm. (Duplicates credit in former PLUS 591.) Prerequisite: PPD 611, PPD 612.

PPD 639 Introduction to Community and Economic Development (4, FaSp) Theories of community and economic development and a contextual understanding of the forces that change the development and community life of urban areas.

PPD 640 Leadership Foundations: Competencies and Core Values (4, Sm) An intensive introduction to leading through core values. Focuses on developing leadership skills at the personal level to build a foundation for leadership at all levels. Open only to Executive Master of Leadership students.

PPD 641 Leading Individuals, Groups and Teams (4, Fa) Leadership styles in various settings; team demographics, and dynamics; problem-solving; decision-making; diversity and critical thinking skills; effect of culture on small group communication; managing conflict. Open only to Executive Master of Leadership students. Prerequisite: PPD 640.

PPD 642 Strategic Leadership of Organizations (4, Sp) Strategic analysis; strategic planning; leadership; performance measurement and management; control systems; organizational structure and networks; organizational culture; organizational learning and change. Open only to Executive Master of Leadership students. Prerequisite: PPD 641.

PPD 643 Leading Transformations Across Sectors: Integrative Seminar (4, Sm) Application and practice of leadership skills working across the public, private and nonprofit sectors. Skills include negotiation, collaboration, communication, political management and ethical responsibilities. Open only to Executive Master of Leadership students. Prerequisite: PPD 642.

PPD 644 Shaping the Built Environment (4) Introduction to the theories and concepts and good city form. Explores the options for designing more livable and sustainable urban communities.

PPD 645 Professional Development (1-4, max 8, Irregular) Selected topics in the practical application of administrative concepts. Graded CR/NC. (Duplicates credit in former PUAD 502.)

PPD 646 Fieldwork (1-4, max 8, Sp) Supervised study of management activities in governmental agencies. Graded CR/NC. (Duplicates credit in former PUAD 503.)

PPD 647 Finance of the Public Sector (4, Sp) Sources of government revenue, intergovernmental financial relations, budgeting, public goods theory. Theoretical and applied skills in analysis of equity and efficiency issues. (Duplicates credit in former PUAD 513.) Prerequisite: PPD 501b.

PPD 648 Concepts and Practices of Public Budgeting (4, Irregular) Budget planning, budget formulation, tools for budget analysis and budget implementation. (Duplicates credit in former PUAD 516.)

PPD 649 Concepts and Practices in Public Personnel Administration (4, FaSm) Concepts of man and of work; workforce; government personnel systems, including merit concepts, classification, and compensation; collective bargaining; organizational justice; training and development. (Duplicates credit in former PUAD 516.)

PPD 650 Organization Development in Public Administration (4, FaSp) Overview of concepts and methodologies of organization development; diagnosing organizational needs; developing change strategies; selecting appropriate interventions. (Duplicates credit in former PUAD 517.)

PPD 651 Seminar in the Administration of Local Government (4, Irregular) Intensive consideration of the functions of the municipal executive and his environment. Research preparation and discussion of cases. (Duplicates credit in former PUAD 520.)

PPD 652 Financial Administration in Local Government (4, Irregular) Revenue sources, fees and charges, benefit assessments; financing economic development and redevelopment, issuing and managing debt, current asset management, and state-local relations. (Duplicates credit in former PUAD 521.)

PPD 653 Training in the Public Sector (4, Fa) Emergence of public service training; learning theories; program development process — assessing needs, design, delivery, and evaluation; role of media; individual, group, organization development; managing training. (Duplicates credit in former PUAD 522.)

PPD 654 Information Technology Management in the Public Sector (4, FaSpSm) Application of computer and information technology in government; e-government; information technology architecture; systems project management. (Duplicates credit in former PPD 516.)

PPD 655 Administrative Law and Public Management (4, FaSpSm) Administrative perspectives on legal principles of agency rule-making and adjudication; distinctions between the two; informal administrative actions; decision-making; judicial review; public control of administrative decisions.

PPD 656 Political Management: Theory and Applied Techniques (4, Sm) Political management theories; strategy formation; research and data collection approaches; computer applications; electronic databases; issue management; problem-solving techniques; ethical considerations. (Duplicates credit in former PUAD 545.)

PPD 657 Political Leadership in Public Organizations (4, Sp) Concepts and skills for public executives and senior managers; understanding the dynamics of governmental institutions and policy processes; organizational and personal assessment skills. (Duplicates credit in former PUAD 546.)

PPD 658 Advocacy in Public Administration (4, Fa) Perspectives on advocacy in the policy process; practice of advocacy; accessing the policy process; simulation of the advocacy process; ethical considerations. (Duplicates credit in former PUAD 547.)

PPD 659 National Security Administration and the Domestic and International Environment (4, Irregular) Interplay of domestic and international environments; resultant constraints upon national security program administration; administrative and organizational implications for future scenarios. (Duplicates credit in former PUAD 549.)

PPD 660 Local Agency Debt and Cash Administration (4, Irregular) Overview of methods of debt and cash administration including official statement analysis; mechanics of different types of issues; and cash management principles. (Duplicates credit in former PUAD 550.)

PPD 661 Intergovernmental Management: Local Perspective (4, Fa) Role of city, special district, and metropolitan governments in intergovernmental relations; intergovernmental impacts on local policy process and service delivery; management of problems and alternatives. (Duplicates credit in former PUAD 552.)
PPD 662 Intergovernmental Management: State Perspective (4, FaSp) Role of state government in intergovernmental relations, emphasis on California experience; financial aspects of intergovernmental system. (Duplicates credit in former PUAD 583.)

PPD 663 Intergovernmental Management: Federal Perspective (4, Irregular) Role of national government in intergovernmental process; impact of federal legislative, executive, and judicial actions on state and local government; intergovernmental policy-making process. (Duplicates credit in former PUAD 554.)

PPD 664 Contract Management (2, Sp) Contract management techniques in the public and private sectors; micro and macro management; compliance and negotiation; conflicts of interest and ethical issues.

PPD 665 Contemporary Issues in Philanthropy (4) Motivations and strategies of philanthropists; philanthropic foundations and emerging institutions for philanthropy; issues of philanthropic stewardship, public policy and public accountability.

PPD 666 Administrative Research and Analysis (4, Irregular) Theory and methods for study of administrative effectiveness: problem solving, performance measurement, administrative and organizational research, quality improvement, and change implementation. (Duplicates credit in former PUAD 506.) Prerequisite: PPD 502x.

PPD 667 Public Ethics (4, Sp) Following an introduction to the study of ethics, relationships among administrative, political and policy ethics are examined, emphasizing the ethics of the administrative role. (Duplicates credit in former PUAD 560.)

PPD 668 Entrepreneurship in the Public Sector (4, Irregular) Providing public services through the private and nonprofit sectors; public-private partnerships; political and organizational skills required for public entrepreneurship. (Duplicates credit in former PUAD 581.)

PPD 669 Federal Management Systems (4, FaSp) Principal institutions and processes in federal government for overhead leadership and control; examines Office of Management and Budget, Office of Personnel Management, Merit Systems Protection Board, General Services Administration, and General Accounting Office. (Duplicates credit in former PUAD 564.)

PPD 670 Management of Intergovernmental Programs (4, Sp) Analysis of relationships among governmental units in delivery of governmental programs; historical development of intergovernmental relations; present status and future implications. (Duplicates credit in former PUAD 566.)

PPD 671 Decision-Making in Regulatory Agencies (4, Irregular) Risk assessment, management, and communication concepts and practices; comparisons of regulatory decision making in regulatory agencies; emerging benefit assessment, cost-effectiveness, and communication issues. (Duplicates credit in former PUAD 567.)

PPD 672 Presidency, Congress, and the Bureaucracy (4, SpSm) Relationships in national government among political executive, legislative, and administrative units; review institutions, formal processes, and political dynamics. (Duplicates credit in former PUAD 568.)

PPD 673 Strategic Planning in the Public Sector (4, Sp) Analysis/field application of action research models for strategic planning in public agencies; design of effective public systems; citizens/administrators' roles in strategic decision-making. (Duplicates credit in former PUAD 574.)

PPD 674 Science, Technology, and Government (4, Irregular) Impact of science/technology on governmental policy, processes, institutions; critical policy areas in science/technology; machinery for formulating science policy; governmental impact on science/technology. (Duplicates credit in former PUAD 575.)

PPD 675 Nonprofit Management and Leadership (4, FaSpSm) Issues in nonprofit management and leadership including: the role of boards; strategic planning; marketing and fund-raising; financial management; and volunteer and human resource management. Recommended preparation: PPD 689.

PPD 676 Comparative Public Administration (4, Irregular) Methodologies, theories and models of comparison; administrative systems; role and functions of the public sector; administrative cultures. (Duplicates credit in former PUAD 579.)

PPD 677 International Development Administration (4, Sp) Development of theories; role of international institutions in resource exchanges; foreign investment and trade policies; national planning and allocation systems; development and modernization strategies and implementation. (Duplicates credit in former PUAD 581.)

PPD 678 Processes of Change in Developing Societies (4, Irregular) Nature of traditional and transitional societies; theories and practice of developmental change; role of bureaucracy in development; institution building; public enterprise; technology assessment and transfer. (Duplicates credit in former PUAD 582.)

PPD 679 Financial Administration in Developing Countries (4, Sm) Public sector finance; tax policy and administration; budgeting and auditing; debt management; public enterprise and development banks; planning; techniques; project assessment. (Duplicates credit in former PUAD 583.)

PPD 680 Development of Effective Groups and Organizations (4, Fa) Theories and techniques of assessing and improving interpersonal relationships and group dynamics in an organizational context; action research-based approaches to implementing organizational change. (Duplicates credit in former PUAD 586.)

PPD 681 Public Organization and Management Theory (4, FaSp) Nature and management of public organizations; examination of organizational characteristics, forms, and processes, including the relationship with the broader environment. (Duplicates credit in former PUAD 595.)

PPD 682 Justice Administration: A Management Perspective (4, 2 years, Fa) Justice administration as an interactive system: law, etiology of crime, police, the judiciary and corrections. Interface of offenders with community and political force fields. (Duplicates credit in former PUAD 540.)

PPD 683 Homeland Security and Public Policy (4, FaSp) Definition and history of terrorism, counterterrorism, domestic policy and public sector management; intelligence/information sharing and analysis; emergency preparedness planning, response and recovery.

PPD 684 Leadership Development in the Public and Nonprofit Sectors (2, Fa) An overview of leadership concepts, frameworks and skills; application of leadership in complex or inter-sectoral settings.

PPD 685 Human Resources Management in Public and Non-Profit Sectors (2, Fa) Merit principles, position classification, recruitment and selection, compensation, organizational development, labor relations: challenges and strategies for managing a diverse workforce.

PPD 687 Strategic Management in the Nonprofit Sector (4, Sp) Strategic management of nonprofit organizations, social entrepreneurship, and management practice. Prerequisite: PPD 675 and PPD 689.

PPD 688 Business and Public Policy (4, Irregular) The business-government relationship; effects of selected public policies (antitrust, economic, and social regulation, industrial policies, legal policy) on firm and industry behavior. (Duplicates credit in former PUAD 557.) Prerequisite: PPD 501b.

PPD 689 The Nonprofit Sector and Philanthropy (4, FaSp) Nonprofit organizations and their relation to government and business; the role of philanthropy, social enterprise and public support; and implications for policy, strategy and management.

PPD 690 Alternative Dispute Resolution (4, Fa) Theory and methods of conflict analysis, negotiation, facilitation and mediation in the public sector. (Duplicates credit in former PUAD 519.)

PPD 691 Transportation and the Environment (4, Sp) Analysis of the benefits and costs of urban transportation; concepts of social costs; benefits and externalities; environmental costs; social justice issues; policy and planning alternatives for sustainable transportation. (Duplicates credit in former PPD 584.) Prerequisite: PPD 501a.

PPD 693 Communicating Public Policy (4) Exploring the complex relationships that exist among policy, policymakers, and the media; analyzing the role of journalists and policy analysts in the public policy process.

PPD 694 Coastal Policy and Planning (4, Sp) Coastal management issues in the context of public and private users competing for land resources, the costs and benefits of seaports, compare coastal development models.

PPD 695 Clinical Issues for Managers (1, Fa) Introduces key information and concepts for managers of clinical services. Examines problems and issues facing health care managers and clinician relations.

PPD 696 Health Care Venture Development (2, SpSm) Focuses on developing the resourcefulness, knowledge and decision support skills needed to identify, assess and develop new health ventures. Includes business planning, financing, strategy, entrepreneurship. Recommended preparation: PPD 502a or HMG 566.

PPD 697 Cultural Proximities in Health Management and Policy (2, Sp) Provides an understanding of what social factors contribute to racial/ethnic, socioeconomic, and gender disparities in health and the culturally proficient provision of health care.

PPD 698 Strategic Management and Change (4) Theory and applied skills in management of social sector organizations with applications in international settings. Strategic management and planning; communication strategies, marketing and promotion; leadership skills; organizational development and change.

PPD 700ab Teaching Seminar (1-1.5, FaSpSm) Pedagogy: learning objectives, curriculum design, teaching methods, evaluation. Open only to doctoral students. Graded CR/NC.

PPD 706 Paradigms of Research and the Design of Inquiry (4, FaSp) Philosophy of social science; applied social research; research design; sampling and validity; overview of qualitative and quantitative methods. Open only to doctoral students.
Policy, Planning, and Development — Expanded (PPDE)

PPDE 630 Community Health Planning (4, 5p) The role of planning in sustaining community health; examines relationship between health and environment; historical development, conceptualization and practice of community health planning.

PPDE 631 Public Space: Theory, Policy, and Design (4) Examination of contemporary issues and practices in the design, production, and uses of public space in a comparative perspective; implications for future design and public policy.

PPDE 632 Sustainable Cities (4, 5p) Exploration of environmental problems linked to urbanization, drawing on historical analysis, social theory, scientific research, and city planning/design practice. Alternative policy options for urban sustainability. (Duplicates credit in the former GEOG 601.)

PPDE 633 Communicating City Design: Positions and Representations (2) Communicating the processes, products, and concepts of city design; merging theoretical and skill-based exercises for effective communication; verbal and graphic communication; physical components of urban landscape and dimensional attributes.

PPDE 634 Methodology, Methods and Tools for Urban Sustainability (2-4, 5p) Methodology, assessment and planning methods for urban sustainability and land use planning; how the choice and use of theory and methods impact the planning process; systems and spatial analysis.

PPDE 635 Housing and Land Use in Rapidly Urbanizing Regions (4, 5p) Interdisciplinary approach to conceptualize urban land and property rights; property rights strategies; design and policy interventions; the struggle for rights to space in the city.

PPDE 644 Land Use and Transportation Planning (4) Key theories of land use — transportation interactions; understanding of land markets and derived-demand approach; use of evidence for information; travel data collection methods; application of land use.

PPDE 645 Financial Management of Nonprofit Organizations (4) Accounting and financial management principles and practices in nonprofit organizations: budgeting financial analysis, internal controls, financial policies, grant making and financial reporting. (Duplicates credit in PPD 541.)

PPDE 646 Grant Writing Practicum (2) Grant making process and proposal development; philanthropic foundations; strategies for funding; budgeting, logic models, and evaluation; peer review.

PPDE 647 Civic Engagement in Governance (4, 5p) Roles of citizens, civic associations, nonprofit organizations, governance and business in democratic governance; civil society as the interface among these entities; techniques, purposes and contexts of civic engagement.

PPDE 648 Performance Management (3) Concept and practice of performance management; examination of performance measurement; analysis and reporting practices for organizational accountability and improvements; performance design, indicators, utilization of information.

PPDE 649 International Development NGOs: Theory, Policy and Management Issues (4) Critical issues involved in international development NGO management; theoretical work and analytical framework to understand organizational features; NGO management, issues and challenges.

PPDE 660 Environmental Policy Design and Analysis (2, 5p) Analytical foundation for design of institutions and policies; environmental policy; welfare economics and market failure; policy evaluation; economic policy instruments; climate change policy issues; other policy issues. Prerequisite: PPD 501a; recommended preparation: PPD 501b.

PPDE 661 Methods for Equity Analysis (4) Techniques to measure inequality and segregation. Policy evaluation using techniques for casual inference. Prerequisite: PPD 555.

PPDE 662 China from a US Policy Perspective (4) Examination of China through the lens of the US federal government; trade issues; economic coordination and stability; environment and sustainability; defense and security; human development.

PPDE 680 Board Governance and Leadership (3) Governance of nonprofit organizations; responsibilities and expectations of boards; board effectiveness; and changes in governance as a result of recent federal and state legislation.

PPDE 681 Fund Development for Nonprofit Organizations (4) Key aspects of the fundraising process for nonprofit organizations; theoretical foundations and general fundraising principles; techniques sources of donations; key aspects of managing the process.

PPDE 682 Strategic Management and Leadership in Nonprofit Organizations (4) Mission-mandated accountable and ethical practice, individually and organizationally; applications of core competencies; practical inquiry, analysis, systems; comparative frameworks; strategic leadership and management of public value production. Prerequisite: PPD 500 and PPD 675 and PPD 689. Open only to Master of Nonprofit Leadership and Management students.

Public Administration (PUAD)

Frequency of course offerings varies from campus to campus. Check with individual campuses regarding availability.

PUAD 613 Seminar in Financial Policy (4, irregular) Historical development and trends in public revenues and expenditures. Political, economic, and administrative significance of decisions in the field of financial management. Prerequisite: PPD 647.

PUAD 617 Seminar on Behavioral Aspects of Training and Development (4, irregular) Theoretical concepts governing the administration of socio-technical systems, organization development, action training and research, and other development and change processes utilized in public service.

PUAD 675 Institutional Context of the Public Sector (4, 5p) Theories of the role, structure and growth of the public sector; public choice processes; political economy of public bureaucracies; the voluntary nonprofit sector. Prerequisite: PPD 501b.

PUAD 685 Seminar on Organizational Behavior in Public Systems (4, 5p) Organizing processes; decision-making; communication; leadership; behavioral models; political and social behavior in organizations. Prerequisite: PPD 545.

PUAD 692 Multivariate Statistical Analysis (4, 5p) Multivariate analysis of qualitative and quantitative variables including multiple linear regression, multiple contingency table analysis, log-linear and logit models, and path analysis. Prerequisite: PPD 502x.

PUAD 695 Seminar in Administrative Theory (4, 5p) Assessment of current normative and descriptive theories of public administration; variety of conceptual
systems; operationalism; levels of organizational analysis. 

Prerequisite: PPD 540.

PUAD 697 Seminar in Public Management (4, Irregular) Public management research and theory; differences between private and public organizations: contextual influences on public management; contemporary empirical studies; bibliographic research. Prerequisite: admission to the DPA program.

PUAD 791ab Public Administration Research Seminar (1, 1, FaSp) Presentation and discussion of research histories and current research projects of members of the faculty and distinguished guest scholars. Open only to Ph.D. and DPA students. Graded CR/NC.

Real Estate Development (RED)

RED 509 Market Analysis for Real Estate (4, Fa) Explores macro and micro aspects of residential, retail, office, and industrial markets and examines methodologies for analyzing such markets for real estate development/investment purposes. Prerequisite: RED 542.

RED 510 Real Estate Practice and Principles (4, FaSp) Fundamental principles of real estate analysis; economics; capital markets; development decision-making; relationships between real estate markets and federal, state and local government policies; property value.

RED 511 Foundations of Real Estate Analysis (4, FaSp) Principles of real estate analysis; capital markets; importance of uncertainty and metrics of risk; investments; valuation techniques; use of debt and equity, leases, taxes. Prerequisite: RED 510.

RED 512 Real Estate Project Analysis (4, FaSp) Fundamental economic theories; analytical techniques; practical applications for market analysis of various forms of real estate. Prerequisite: RED 511.

RED 541 Finance Fundamentals for Real Estate Development (2, Sm) Introduction to the general principles of finance with application to real estate development, including capital markets, financial institutions, valuation and risk management.

RED 542 Finance of Real Estate Development (3, FaSm) Theory and methods of real estate finance and investment. Real estate investment analysis, real estate entities, taxation; introduction to securitization of real estate equities, debt. Prerequisite: RED 541.

RED 545 Advanced Real Estate and Financial Modeling (2, Sp) Quantitative problem solving using computerized modeling. Complex debt financing, including lender participation, subordination, joint venture structuring, systematic treatment of real estate portfolios. Prerequisite: RED 542.

RED 546 Applications of Real Estate Finance to Problems of Development (3, Sp) Advanced topics in finance applied to cases and problems of real estate development; emphasis on structuring, finance and evaluation of various types of development projects. Prerequisite: RED 542.

RED 551 The Approval Process (4, FaSpSm) Approval process for real estate development including land use entitlement, site selection, zoning, environmental review, community and government relations, infrastructure financing, ethical issues, negotiation skills.

RED 562 Legal Issues in Real Estate Development (4, FaSp) Ownership and transfer of real estate; formation and enforcement of contracts; business associations; environmental regulation; taxation of property transfers; acquiring, financing, leasing of commercial property. (Duplicates credit in former RED 662.)

RED 563 Introduction to the Asset Management of Real Estate (2, Fa) Overview of institutional asset management: creating and implementing investment and portfolio strategies through the development, acquisition, underwriting, and operational stages of the investment, asset disposition.

RED 564 Issues in Asset Management of Real Estate (2, Sp) Advanced issues in institutional asset management. How value is created during investment process with focus on tactical, operational, and strategic goals of asset and owner. Prerequisite: RED 563.

RED 573 Design History and Criticism (2, Sm) The concepts, language and metaphors of design-related disciplines are examined in relation to design and construction values and choices in real estate development. (Duplicates credit in former RED 673.)

RED 574 Building Typologies (2, Fa) The exploration of categories of building types, including retail, industrial, residential, office and institutional, using key examples or case studies from each. (Duplicates credit in former RED 674.)

RED 575L Community Design and Site Planning (2-4, max 8, Sp) Physical implementation of development projects. Students will develop concept plan, preliminary design and marketing plan for selected domestic and/or international development sites. (Duplicates credit in former RED 675L.)

RED 583 International Development Opportunities (2, Sp) A survey of various markets prominent in the global real estate community. Protocols for analyzing international development opportunities and cultural, political, and socioeconomic considerations.

RED 585 Comparative International Development Workshop (2-4, Sm) Comparative study tour focused on understanding international real estate development practices and markets, site visits and meeting with principals.

RED 590 Directed Research (1-12, FaSpSm) Research leading to the master’s degree. Maximum units which may be applied to the degree to be determined by the department.

RED 598 Real Estate Product Development (2-4, max 12, FaSpSm) An evaluation of various real estate development types. Case studies and site visits.

RED 599 Special Topics (2-4, max 8) Current issues, trends, and developments in real estate development.

Military Courses of Instruction

• Aerospace Studies
• Military Science
• Nautical Science

Aerospace Studies (AEST)

AEST 100ab Aerospace Studies I: Air Force Mission and Organization (1-1, FaSp) a: Introduction to U.S. Air Force and the military profession; USAF organization and functions; Strategic Air Command organization, command, control, and weapons systems; communication skills. b: Organization and function of NORAD; tactical air, military airlift, systems, logistics, air training and communications commands; Army, Navy, Marines; reserves; separate operating agencies.

AEST 110ab Leadership Laboratory I (1-1, FaSp) Introduction to the military experience focusing on customs and courtesies, drill and ceremonies, and the environment of an Air Force officer. Graded CR/NC.

AEST 200ab Aerospace Studies II: Air Force History (1-1, FaSp) a: Development of aerospace power in the U.S. through World War II; emphasis on the Army Air Corps; communication skills. b: Development of aerospace power since World War II; emphasis on international confrontations involving the United States; communication skills.

AEST 310ab Leadership Laboratory II (1-1, FaSp) Introduction to the military experience focusing on customs and courtesies, drill and ceremonies, and the environment of an Air Force officer. Graded CR/NC.

AEST 320ab Advanced Leadership Laboratory II (a: 1, Fa; b: 1, Sp) Additional exposure to the military experience for continuing AFROTC cadets, focusing on customs and courtesies, drill and ceremonies, and the environment of an Air Force officer. Graded CR/NC.

AEST 400ab Aerospace Studies IV: National Security Forces in Contemporary American Society (3, FaSp)
Military professionalism and the context in which defense policy is formulated and implemented; national security policy, political/social constraints, and military justice.

AEST 410ab Leadership Laboratory IV (1-1, FaSp)
Advanced Air Force leadership experience focusing on the practical development of the Air Force officer through command and staff positions within the Cadet Corps. Graded Cr/NC.

AEST 420ab Leadership Laboratory V (1-1, FaSp)
Advanced leadership experiences for AFROTC continuing cadets. Graded Cr/NC.

Military Science (MS)

MS 101 Foundations of Officership (1, Fa) introduces students to issues and competencies that are central to a commissioned officer’s responsibilities. Establish framework for understanding officership, leadership, and Army values followed and — life skills — such as physical fitness and time management. (Duplicates credit in former MS 100.)

MS 102 Basic Leadership (1, Sp) Establishes foundation of basic leadership fundamentals such as problem solving, communications, briefings and effective writing, goal setting, techniques for improving listening and speaking skills and an introduction to counseling. (Duplicates credit in former MS 101.)

MS 201 Individual Leadership Studies (2, Sp) Students identify successful leadership characteristics through observation of others and self through experimental learning exercises. Students record observed traits (good and bad) in a dimensional leadership journal and discuss observations in small group settings. (Duplicates credit in former MS 202.)

MS 202 Leadership and Teamwork (2, Sp) Study examines how to build successful teams, various methods for influencing action, effective communication in setting and achieving goals, the importance of timing the decision, creativity in the problem solving process, and obtaining team buy-in through immediate feedback. (Duplicates credit in former MS 201.)

MS 203 Leadership and Problem Solving (3, Fa) Students conduct self-assessment of leadership style, develop personal fitness regimen, and learn to plan and conduct individual/small unit tactical training while testing reasoning and problem-solving techniques. Students receive direct feedback on leadership abilities. (Duplicates credit in former MS 202.)

MS 204 Leadership and Ethics (3, Sp) Examines the role communications, values, and ethics play in effective leadership. Topics include ethical decision-making, consideration of others, spirituality in the military, and survey Army leadership doctrine. Emphasis on improving oral and written communication abilities. (Duplicates credit in former MS 203.)

MS 401 Leadership and Management I (3, Fa) Develops student proficiency in planning and executing complex operations, functioning as a member of a staff, and mentoring subordinates. Students explore training management, methods of effective staff collaboration, and developmental counseling techniques. (Duplicates credit in former MS 400.)

MS 402 Leadership and Management II (3, Sp) Study includes case study analysis of military law and practical exercises on establishing an ethical command climate. Students must complete a semester long Senior Leadership Project that requires them to plan, organize, collaborate, analyze, and demonstrate their leadership skills. (Duplicates credit in former MS 410.)

MS 499 Special Topics (2-4, max 8, FaSpSm) Selected topics in military science.

Naval Science (NAUT)

NAUT 001abx Deepwater Cruising (2-2, FaSp) An experiential approach to the sailing ship and seamanship. Lecture and lab. Not available for degree credit. a: Crew level. b: Watch captain.

NAUT 002abx Advanced Deepwater Cruising (2-2) Responsibilities and operations commanding an offshore sailing vessel including sailing theory and advanced techniques, advanced navigation, ships engineering, and oceanography relevant to seamanship. Not available for degree credit. a: Senior skipper. b: Advanced senior skipper. (Duplicates credit in former NAUT 302ab.) Prerequisite: NAUT 001bx.

NSC 135 Introduction to Naval Science (2, Fa) Introduction to the structure, principles, and practices, lines of command and control, and functions of the various components of the naval service. Lecture, 2 hours; laboratory, 2 hours.

NSC 137 Seapower and Maritime Affairs (4, Sp) Analysis of U.S. Navy development and campaigns; evolution of strategic, tactical, and maritime doctrines; interaction of naval affairs with national security and domestic policies. Lecture, 3 hours; laboratory, 2 hours.

NSC 231 Seamanship and Ship Operations (3, Fa) Vector solutions of relative motion, tactical problems; tactical communications, instructions; fleet communications, organizations; rules of the Nautical Road; aviation and maritime meteorology; operation plans and orders. Lecture, 3 hours; laboratory, 1 hour.

NSC 283 Naval Ships Systems I (Engineering) (3, Sp) Types, structure, and purpose of Naval ships; compartmentation, propulsion systems, auxiliary power systems, interior communications, ship control; ship design and stability. Lecture, 3 hours; laboratory, 2 hours.

NSC 235 Navigation (3, Fa) Purposes, methods, and instruments of navigation; terrestrial and celestial navigation and nautical astronomy; time diagrams; lines of position by observation of celestial bodies. Lecture, 3 hours; laboratory, 2 hours.

NSC 287 Naval Ships Systems II (Weapons) (3, Sp) Systems approach to naval weapons; linear analysis of ballistics; weapons control systems configurations and dynamics. Field trips. Lecture, 3 hours; laboratory, 2 hours.

NSC 343 Evolution of Warfare (3, Fa) Causes and practice of warfare from ancient times; impact of changes in strategy, tactics, and technology; modern revolutionary warfare, global conflict, and politico-military relationships. Lecture, 3 hours; laboratory, 2 hours.

NSC 392 Amphibious Warfare (3, Fa) Concepts of seaborne military operations; relationship of factors involved; characteristic operations of World War II; amphibious operation planning. Lecture, 3 hours; laboratory, 2 hours.
